SUBJECT INDEX

KEY

In using this index the following should be borne in mind:

1. **Subjects**, not words, have been indexed.
2. **Abstracts**, not merely their titles, have been considered in indexing.
3. The small **superior numeral** which accompanies each page number designates the fraction of the page in ninths in which the subject being indexed is first considered. The printed matter only, exclusive of page headings, has been thus subdivided.

4. "P" before a page number indicates that the abstract is of a **patent**.

5. The **alphabetizing of index headings** has been done on the basis first of that part which comes before the comma in such headings as *Copper*, *metallurgy of* and *Phenol*, *p-nitro*-. E. g., these headings come before the headings *Copper compounds* and *Phenol condensation products*, respectively.

6. **Organic compounds** are indexed on the basis of "parent compounds," or more accurately, "index compounds" (see Introduction), the names of substituent radicals following in alphabetical order. The system of naming organic compounds which has been used is outlined in the Introduction below. Esters and salts of organic acids are, in general, indexed under the names of the acids; notes in the index under the appropriate headings explain the few exceptions.

7. An **asterisk** (*) following the name of an organic compound entered in the index signifies that the name, or numbering, or both are the author's own and may not conform to the system of nomenclature used in this index. This sign is used where it has seemed inadvisable, owing to incomplete information, to attempt to make the name conform to the system, or where the author's name, differing widely from the one given to the compound by the indexer, is given as an extra entry.

8. A **dagger** (†), which follows the names of a few compounds, signifies that the entry is an extra one, the name being only slightly less favored than the one chosen for the other entry. The preferred name can be determined by reference to the Formula Index.

The desirability of making the index readily usable without the need of reference to an elaborate introduction has been held constantly in mind. Although an introduction seems desirable and should be helpful, nevertheless the index is dependent neither on the Key nor on the Introduction. Numerous cross-references are given throughout the index, and notes appear in connection with certain headings. An examination of the Introduction, which follows, should be especially helpful to those interested in looking up organic compounds.

INTRODUCTION

 **General policy.** The indexing of subjects, as opposed to word-indexing, has been emphasized. This avoids omissions, scattering and unnecessary entries; with the abundant cross-references used it means that one should be able to find all of the references on any subject with certainty and with a minimum of effort. The words used as subject headings or in modifying phrases are not necessarily to be found in the abstracts but an expression of the idea suggested will be found within or beginning in the ninth of the page designated by the small superior numeral following the page number. Chemical compounds have been named and entered systematically; the system used is outlined below. All new compounds and all elements, compounds and other substances for which new data are given have been indexed, with the single exception of new compounds for which no names or structures have been given. Such compounds are entered only in the Formula Index. The Subject Index is in no other respect altered because of the Formula Index.

Modifying phrases. In writing such phrases for the entries under any heading the words have been arranged so that the idea considered to be the most important is expressed at the beginning whenever feasible and this procedure, as well as the selection of the words for this purpose, has been governed by numerous formulated general principles and specific rules. *E. g.*, "detection of" has been used consistently whenever correct at the beginning of the modifications in indexing subjects treated from a qualitative analytical point of view, instead of permitting a scattering under such additional phrases as "test for," "reaction for," etc., regardless of what words may have been used in the text. In the case of appropriate headings the selection of first words for modifications has been made on the basis of a definite system of classification. Under a few large headings two or more entries have been made on indexing a subject in a single abstract in case two or more ideas could be used equally well to start the modifying phrase. In alphabetizing modifying phrases prepositions at the beginning have been ignored.

References to fractions of the page. One can readily estimate ninths of a page with considerable accuracy by placing the fore or middle finger one-third of the distance from the top of the printed matter on the page and the thumb one-third of the distance from the bottom, a procedure very easily carried out.

Inorganic compounds. Simple inorganic compounds are entered under the usual names. In indexing compounds of iron, gold, copper and tin such headings as *Iron sulfates*, under which the "ous" and "ic" salts are entered, have been used rather than headings beginning with "ferric(ous)," "auric(ous)," "cupric(ous)," or "stannic(ous)." Acid salts, such as NaH_2PO_4 , are entered under such headings as "*Sodium phosphates*." With the exception of a few common compounds, such as carbon dioxide and carbon monoxide, compounds of a given element with another or with a definite radical, which differ only in valence relations, are grouped. *E. g.*, the various oxides of nitrogen are grouped under the heading "*Nitrogen oxides*" and classified there. Complex inorganic compounds which cannot be given definite names satisfactory for indexing are usually indexed under the heading which represents the class of compounds concerned and under a heading of the type *Nickel compounds*, depending on what the significant element is. *E. g.*, dichlorotetraamminecobaltic chloride would be indexed under "*Ammino compounds*" and under "*Cobalt compounds*." The Formula Index, which follows the Subject Index, should be particularly helpful in locating complex compounds.

Organic compounds. The system used for naming and indexing organic compounds is the same as that in use starting with the 1916 volume. An explanation of it by

Austin M. Patterson and Carleton E. Curran, who are its originators, has appeared in another journal of the Society.¹ The system is based on existing usage and follows this as far as is practicable, so that a great many familiar names are unaffected. Only the general principles will be given here, but in the index itself will be found abundant cross references and also notes under *Alcohols*, *Ketones*, etc., indicating how compounds of these classes are named.

1. The "chief function" of a compound is expressed in the main part of the name wherever possible, and not as a substituent, thus: Pyrrolecarboxylic acid, not carboxypyrrole; ethyl alcohol or ethanol, not hydroxyethane; pentanone, not ketopentane.

2. In compounds of mixed function, the chief function is determined from the following order of precedence:² "onium" compounds, acid (carboxylic first), acid halide, amide, imide, aldehyde, nitrile, ketone, alcohol, phenol, mercaptan, amine, imine, ether, sulfide (and sulfoxide and sulfone). Thus, hydroxybenzonitrile, not cyanophenol; aminophenol, not hydroxyaniline.

3. A multiple chief function is expressed where feasible as -diol, -dicarboxylic acid, etc., rather than as hydroxy-ol, carboxy-acid, etc. But amino and imino groups attached to cyclic bases are treated as substituents; as, aminopyridine.

4. The index compound should be as large, and the substituents as small, as is practicable in conformity with the above rules; as, ethylbenzene, not phenylethane. But such names as diphenylethane and triphenylcarbinol are exceptions. When the chief function is in a side chain attached to a complex nucleus, "additive" names are preferred in order to harmonize 1 and 4; thus, naphthaleneacetic acid, not naphthylacetic acid (with the result that the compound is indexed with other naphthalene derivatives instead of under acetic acid; see 5).

5. The main part of the name with its functional ending, if any, is placed first in the index, the names of substituents following; thus, chloroacetic acid would appear in the index as *Acetic acid, chloro-* and dihydroxyanthraquinone as *Anthraquinone, dihydroxy-*. The part thus placed first is called the "index compound"; it may or may not be the "parent compound" (in the second example the parent compound is anthracene).

6. Names in which two functions are expressed in the index compound, as propanolone, cyclopentanonecarboxylic acid, are avoided, except that a few very common ones, such as phenolsulfonic acid, are used (indicated by cross-references).

7. The names of the substituent radicals in the name of a compound are arranged in alphabetical order; as, benzylethylmethylphenylammonium chloride. The number of radicals of each kind does not affect the order (e. g., *benzyl* precedes *ethyl* no matter how many of each are present); but the compound name of a substituted radical is treated as a unit with its own alphabetic position; thus *dimethylamino*, Me₂N-, follows *benzyl* but precedes *ethyl*. When the complete name has been formed, it is alphabetized as any other word.

8. Parentheses, brackets and even braces are used where necessary to mark off complex radical names.

9. Familiar methods of numbering are employed (Greek letters for acids, alcohols, etc., and for side chains; arabic numerals for Geneva names and rings). The numbering of complex nuclei is shown in the index under the parent compounds; it is practically identical with that of Richter's "Lexikon" so far as that work goes.

10. When two or more numberings are equally indicated that one is chosen which gives the smallest number or numbers for the chief function, then for double bonds if these

¹ Patterson and Curran, *J. Am. Chem. Soc.*, **39**, 1623-38(1917).

² This order is an attempt to express, not the relative chemical importance of functions, but general usage in selecting one of them for the ending of the name.

must be regarded, then for triple bonds, then for point of attachment (doubled molecules), then for substituents.

11. Unnecessary numbers are avoided: thus, in Δ^3 -1-cyclohexanol the 1 is not needed because by the rules in paragraph 10 the OH group is assumed to be in position 1.

12. Numbers in parentheses are used to indicate the position of entering hydrogen necessary to the existence of the compound; thus, 4(3)-quinolone is equivalent to 3, 4-dihydro-4-ketoquinoline.

13. Doubled molecules or radicals are indicated by names commencing with *bi-* (as, *o,o'*-biphenol, biphenyl, $\Delta^{4,4'}$ -bipiperidine). *Bis-* is used for like molecules united by a bivalent radical and for double complex expressions; as, methylenebisphenol, bis(dimethylamino)-.

In using the cross-references, the general nature of many of them should be kept in mind; thus, the reference "*Benzene, ethoxy-*. See *Phenetole*" is applicable not only to this compound itself but to derivatives, which are indexed under it rather than under *Benzene*.

ORGANIC RADICALS

This being the first volume of another ten-year period for *Chemical Abstracts* there are listed below, for convenient reference, practically all organic radicals recognized in the system of indexing used by *Chemical Abstracts*, whether or not they happen to occur in entries in the index for this year. The omissions consist of some of the less frequently occurring names of acid radicals regularly formed from the names of the acids, and occasional bivalent radical names ending in *-ylidene* when regularly formed from names ending in *-yl*. The radicals are listed (1) alphabetically by names and (2) by formulas, the Hill system for arranging the formulas having been used (for an explanation of it, see the "Key" at the beginning of the Formula Index).

BY NAMES

acenaphthenyl $C_{12}H_7$ —(from *acenaphthene*)
acetamido CH_3CONH —
acetenyl = ethinyl
acetimido $CH_3C(NH)$ —
acetonyl CH_3COCH_2 —
acetonilydene CH_3COCH —
acetoxy CH_3COO —
acetyl CH_3CO —
acetylene = $CHCH$ —
acridyl (from *acridine*) $C_{13}H_8N$ —
acrylyl $CH_2=CHCO$ —
adipyl — $OC(CH_2)_4CO$ —
alanil CH_3CHNH_2CO —
alkoxy RO —(any alkyl radical attached by oxygen)
allyl $CH_2=CHCH_2$ —
 β -allyl = isopropenyl
amidoxalyl = oxamyl
amino (amido) H_2N —
amoxy $CH_3(CH_2)_nO$ —
amyl $CH_3(CH_2)_4$ —

tert-amyl

$$\begin{array}{c} CH_3CH_2 \\ | \\ C \\ | \\ (CH_3)_2 \end{array}$$
 amylidene $CH_3(CH_2)_4CH$ —
 anilino C_6H_5NH —
 anisal *p*- $CH_3OC_6H_4CH$ —
 anisoyl *p*- $CH_3OC_6H_4CO$ —
 anisyl (*o*, *m* or *p*) $CH_3OC_6H_4$ —
 anisylidene = anisal

anthranilo o - C_6H_4 —

$$\begin{array}{c} CO \\ | \\ N \end{array}$$
 anthranoyl o - $H_2NC_6H_4CO$ —

anthraquinonyl (from *anthraquinone*, 2 isomers)
 anthryl (from *anthracene*, 5 isomers)
 anthrylene — $C_{14}H_8$ —(from *anthracene*, 11 isomers)
 antipyril (from *antipyrine*)

arseno - $As:As$ —
 arsino (from *arsinic acid*) $(OH)OAs$ —
 arsinoso $O:As$ —
 arsono (from *arsonic acid*) $(HO)_2OAs$ —
 arsyl H_2As —
 arsyleno HAS —
 asaryl 2,4,5- $(CH_3O)_3C_6H_2$ —
 asparagyl $H_2NCOCH_2CHNH_2CO$ —
 aspartyl — $COCH_2CHNH_2CO$ —
 auro Au —
 azimino (azimido) — $N \cdot NNH$ —
 azido = triazo
 azino = NN —
 azo — $N \cdot N$ —

azoxy — NON —
 benzal C_6H_5CH —
 benzamido C_6H_5CONH —
 benzenyl C_6H_5C —
 benzidino (from *benzidine*)
 $H_2NC_6H_4C_6H_4NH$ —
 benzimidazolyl (from *benzimidazole*) C_7H_5N —
 benzimido $C_6H_4C(NH)$ —
 benzofuryl (from *benzofuran*) C_8H_5O —
 benzohydryl $(C_6H_5)_2CH$ —
 benzohydrylidene = diphenylmethyleno

benzopyranyl (from *benzopyran*) $C_8H_7O(2-\alpha, \text{etc.})$

benzoxazolyl (from *benzoxazole*) C_7H_4NO-

benzoxy C_6H_5COO-

benzoyl C_6H_5CO-

benzoylene $-C_6H_4CO-$

benzyl $C_6H_5CH_2-$

benzylidene = benzal

heptyl $CH_3(CH_2)_6-$

hexadecyl = cetyl

hexyl $\text{CH}_3(\text{CH}_2)_5$ —
homopiperonyl (3,4) $(\text{CH}_2\text{O})_2\text{C}_6\text{H}_5\text{CH}_2\text{CH}_2$ —
hydrazide

hydrazino H_2NNH —
hydrazo — HNNH — (to different atoms)
hydrazono $\text{H}_2\text{NN}=\text{}$
hydroxamino HONH —
hydroximino = isonitroso
hydroxy (hydroxyl) HO —
-idene added to any radical usually means a double bond at point of attachment
imidazolyl (from imidazole, 4 isomers) $\text{C}_3\text{H}_3\text{N}_2$
imino (imido) $\text{HN}=\text{}$
indanyl (from indan, 4 isomers) C_{10}H_7 —
indenyl (from indene, 7 isomers) C_{10}H_7 —
indyl (from indole, 7 isomers) $\text{C}_8\text{H}_6\text{N}$ —
indylidene

iodo I —
iodoso OI —
iodoxy OI —
isoallyl = propenyl
isoamoxy $(\text{CH}_3)_2\text{CHCH}_2\text{CH}_2\text{O}$ —
isoamyl $(\text{CH}_3)_2\text{CHCH}_2\text{CH}_2$ —
isoamylidene $(\text{CH}_3)_2\text{CHCH}_2\text{CH}=\text{}$
isobutenyl $(\text{CH}_3)_2\text{C}=\text{CH}$ —
isobutoxy $(\text{CH}_3)_2\text{CHCH}_2\text{O}$ —
isobutyl $(\text{CH}_3)_2\text{CHCH}_2$ —
isobutyryl $(\text{CH}_3)_2\text{CHCO}$ —
isocyno $\text{C}:\text{N}$ —
isodiazoo

isohexyl $(\text{CH}_3)_2\text{CH}(\text{CH}_2)_3$ —
isoindyl (from isoindole, 4 isomers) $\text{C}_8\text{H}_6\text{N}$ —
isoleucyl $\text{CH}_2\text{CH}_2\text{CH}(\text{CH}_3)\text{CHNH}_2\text{CO}$ —
isonitro $\text{HOON}=\text{}$
isonitroso $\text{HON}=\text{}$
 Δ^1 -isopentenyl $(\text{CH}_3)_2\text{CHCH}=\text{CH}$ —
isophthalal = $\text{HCC}_6\text{H}_4\text{CH}=\text{}$ (m)
isophthalylidene = isophthalal
isopropenyl $\text{CH}_2=\text{C}(\text{CH}_3)$ —
isopropoxy $(\text{CH}_3)_2\text{CHO}$ —
isopropyl $(\text{CH}_3)_2\text{CH}$ —
isopropylidene $(\text{CH}_3)_2\text{C}=\text{}$
isoquinolyl (from isoquinoline, 9 isomers) $\text{C}_9\text{H}_6\text{N}$ —
isothiocyno $\text{S}:\text{C}:\text{N}$ —
isovaleryl $(\text{CH}_3)_2\text{CHCH}_2\text{CO}$ —
isoxazolyl (from isoxazole, 5 isomers) $\text{C}_3\text{H}_2\text{ON}$
keto $\text{O} =$ (to same atom)
leucyl $(\text{CH}_3)_2\text{CHCH}_2\text{CHNH}_2\text{CO}$ —
malonyl — OCCCH_2CO —
menthyl (from menthane): as, 2 p menthyl

$\text{CH}_3\text{CH}(\text{CH}_2)_2\text{CH}(\text{i-C}_6\text{H}_7)\text{CH}_2\text{CH}$ —
mercapto HS —
mercuri — Hg —
 α -menthyl

2-mesityl

methene = methylene
methenyl $\text{CH}=\text{}$
methionyl $\text{CH}_2(\text{SO}_2)_2$ —
methoxy CH_3O —
methyl CH_3 —
methylene CH_2 —
methylenedioxy — OCH_2O —
methylol = (hydroxymethyl)
naphthal $\text{C}_{10}\text{H}_7\text{CH}=\text{}$
naphthalimido (from naphthalic acid) $\text{C}_{10}\text{H}_6(\text{CO})_2$ —
N—
naphthenyl $\text{C}_{10}\text{H}_7\text{C}$ —
naphthoxy $\text{C}_{10}\text{H}_7\text{O}$ —
naphthoyl $\text{C}_{10}\text{H}_7\text{CO}$ —
naphthyl (1- or 2-) C_{10}H_7 —
naphthylene C_{10}H_6 —
naphthylidene

nitramino O_2NNH —
nitrilo N^{\equiv} —
nitro O_2N —
aci-nitro = isonitro
nitroso ON —
norcamphanyl (from norcamphane) $\text{C}_{10}\text{H}_{17}$ —
octyl C_8H_{17} —
oxalyl — OCCO —
oxamido $\text{H}_2\text{NCOCONH}$ —
oxamyl H_2NCOCO —
oximido = isonitroso
oxy — O — (used as a connective, cf. epoxy and keto)
pentamethylene — $\text{CH}_2(\text{CH}_2)_3\text{CH}_2$ —

pentazyl $\text{N}=\text{N}=\text{N}=\text{N}=\text{N}$ —
pentenyl (like butenyl) C_5H_9 —
pentyl = amyl
perimidyl (from perimidine, 8 isomers) $\text{C}_{11}\text{H}_7\text{N}_2$
perthio $\text{S}=\text{S}$ —
phenacyl $\text{C}_6\text{H}_5\text{COCCH}_2$ —
phenacylidene $\text{C}_6\text{H}_5\text{COCCH}=\text{}$
phenanthryl (from phenanthrene, 5 isomers) C_{14}H_9 —
phenanthrylene C_{14}H_8 — (several isomers)
phenenyl C_6H_3 = (s, as-, v-)
phenethyl $\text{C}_6\text{H}_5\text{CH}_2\text{CH}_2$ —
phenetidino $\text{C}_2\text{H}_5\text{OC}_6\text{H}_4\text{NH}$ —
phenetyl (o, m or p) $\text{C}_2\text{H}_5\text{OC}_6\text{H}_4$ —
phenoxy $\text{C}_6\text{H}_5\text{O}$ —
phenyl C_6H_5 —
phenylazo $\text{C}_6\text{H}_5\text{N}=\text{N}$ —
phenylcarbamido $\text{C}_6\text{H}_5\text{NHCONH}$ —
phenylene (o, m or p) C_6H_4 —
phenylenedisazo — $\text{N}:\text{NC}_6\text{H}_4\text{N}$ — (o, m, p)
phenylidene (o or p; p shown below)

$\text{CH}=\text{CH}(\text{CH}_2)_3\text{CH}=\text{CH}=\text{C}$ —
phenylureido = phenylcarbamido
phosphazo — $\text{N}:\text{P}$ —
phosphono $\text{H}_2\text{O}_2\text{P}$ —

phthalal = $\text{HC}_6\text{H}_4\text{CH}=\text{(o)}$

phthalidene (from phthalide)

phthalidyl

phthalimido $\text{C}_6\text{H}_4(\text{CO})_2\text{N}=\text{(o)}$

phthalyl $\text{—OCC}_6\text{H}_4\text{CO}=\text{(o)}$

picryl (2,4,6) $(\text{NO}_2)_3\text{C}_6\text{H}_2=\text{(o)}$

piperidyl (from piperidine, 4 isomers) $\text{C}_6\text{H}_{10}\text{N}=\text{(o)}$

piperonyl (3,4) $(\text{CH}_3\text{O})_2\text{C}_6\text{H}_3\text{CH}=\text{(o)}$

piperonylidene (3,4) $(\text{CH}_3\text{O})_2\text{C}_6\text{H}_3\text{CH}=\text{(o)}$

prolyl (from proline)

propargyl $\text{HC}::\text{CCH}_2=\text{(o)}$

propenyl $\text{CH}_3\text{CH}::\text{CH}=\text{(o)}$

propenylidene $\text{CH}_3\text{CH}::\text{C}=\text{(o)}$

propionyl $\text{HC}::\text{CCO}=\text{(o)}$

propionyl $\text{CH}_3\text{CH}_2\text{CO}=\text{(o)}$

propoxy $\text{CH}_3\text{CH}_2\text{CH}_2\text{O}=\text{(o)}$

propyl (n) $\text{CH}_3\text{CH}_2\text{CH}_2=\text{(o)}$

propylene $\text{—CH}(\text{CH}_3)\text{CH}_2=\text{(o)}$

propylidene $\text{CH}_3\text{CH}_2\text{CH}=\text{(o)}$

pseudoallyl = isopropenyl

as-pseudocumyl (2,3,5) $(\text{CH}_3)_3\text{C}_6\text{H}_2=\text{(o)}$

s-pseudocumyl (2,4,5) (o)

σ pseudocumyl (2,3,6) (o)

pseudoindyl (from pseudoindole, 7 isomers)

$\text{C}_8\text{H}_5\text{N}=\text{(o)}$

pyranlyl $\text{C}_6\text{H}_4\text{O} (2-\alpha, 2-\gamma, 3-\alpha, \text{etc})$

pyrazolyl (from pyrazole, 4 isomers) $\text{C}_4\text{H}_3\text{N}_2=\text{(o)}$

pyridyl (from pyridine, 3 isomers) $\text{C}_5\text{H}_4\text{N}=\text{(o)}$

pyridylidene

4(1)-

pyrimidyl (from pyrimidine) $\text{C}_4\text{H}_3\text{N}_2=\text{(o)}$

pyromucyl $\text{O}::\text{CH}::\text{CH}::\text{C}::\text{CO}=\text{(o)}$

pyrrolidyl (from pyrrolidine, 3 isomers) $\text{C}_4\text{H}_7\text{N}=\text{(o)}$

pyrrolyl $\text{CH}::\text{CH}::\text{CH}::\text{CH}::\text{N}::\text{CO}=\text{(o)}$

pyrrol (from pyrrole, 3 isomers) $\text{C}_4\text{H}_5\text{N}=\text{(o)}$

quinolyl (from quinoline, 7 isomers) $\text{C}_8\text{H}_6\text{N}=\text{(o)}$

quinonyl (from quinone) $\text{C}_6\text{H}_4\text{O}_2=\text{(o)}$

quinoxalyl (from quinoxaline) $\text{C}_8\text{H}_5\text{N}_2=\text{(o)}$

salicyl (o) $\text{HOC}_6\text{H}_4=\text{(o)}$

salicylal (o) $\text{HOC}_6\text{H}_4\text{CH}=\text{(o)}$

salicylyl (o) $\text{HOC}_6\text{H}_4\text{CO}=\text{(o)}$

selenino $(\text{HO})\text{OSe}=\text{(o)}$

seleno $\text{Se}=\text{(o)}$

selenocyano $\text{NCSe}=\text{(o)}$

selenono $\text{HO}_2\text{Se}=\text{(o)}$

selenonyl $\text{—SeO}=\text{(o)}$

selenyl, $\text{HSe}=\text{(o)}$

semicarbazido $\text{NH}_2\text{CONHNH}=\text{(o)}$

silicono $(\text{OH})\text{OSi}=\text{(o)}$

silicyl $\text{HSi}=\text{(o)}$

silicylene $\text{H}_2\text{Si}=\text{(o)}$

stannyl $\text{H}_2\text{Sn}=\text{(o)}$

stearyl $\text{CH}_3(\text{CH}_2)_{16}\text{CO}=\text{(o)}$

tibono $(\text{HO})_{25}\text{OSb}=\text{(o)}$

styrene $\text{—CH}(\text{C}_6\text{H}_5)\text{CH}_2=\text{(o)}$

styrolene = styrene

styryl $\text{C}_6\text{H}_5\text{CH}::\text{CH}=\text{(o)}$

succinamyl $\text{H}_2\text{NCOCH}_2\text{CH}_2\text{CO}=\text{(o)}$

succinyl $\text{—OCCCH}_2\text{CH}_2\text{CO}=\text{(o)}$

sulfamino $\text{HO}_2\text{SNH}=\text{(o)}$

sulfamyl $\text{H}_2\text{NO}_2\text{S}=\text{(o)}$

sulfhydryl = mercapto

sulino $\text{HO}_2\text{S}=\text{(o)}$

sulfinyl $\text{OS}=\text{(o)}$

sulfo $\text{HO}_2\text{S}=\text{(o)}$

sulfonamido $\text{—SO}_2\text{NH}=\text{(o)}$

sulfonyl $\text{—SO}_2=\text{(o)}$

sulfuryl = sulfonyl

tauryl $\text{H}_2\text{NCH}_2\text{CH}_2\text{SO}_2=\text{(o)}$

telluro $\text{Te}=\text{(o)}$

terephthalal = $\text{HC}_6\text{H}_4\text{CH}=\text{(p)}$

tetramethylene = 1,4-butylene

tetrazyl (from tetrazole, 2 isomers) $\text{CHN}_4=\text{(o)}$

thiazyl (from thiazole, 3 isomers) $\text{C}_2\text{H}_2\text{NS}=\text{(o)}$

thienyl (from thiophene, 2 isomers) $\text{C}_4\text{H}_3\text{S}=\text{(o)}$

thio $\text{—S}=\text{(o)}$

thiocarbonyl $\text{SC}=\text{(o)}$

thiocyano $\text{NCS}=\text{(o)}$

thiohydroxy = mercapto

thiol (S replacing O in OH) of "thio" only
thiono (S replacing O in CO) when required
for distinction

thionyl = sulfinyl

thujyl (from sabinane, attached at 2 positions)
 $\text{C}_{10}\text{H}_{17}=\text{(o)}$

thymyl (from thymol)

$\text{HC}(\text{CH}_3)\text{CH}::\text{CH}::\text{C}(\text{C}_6\text{H}_7)\text{C}=\text{(o)}$

toloxyl (o, m or p) $\text{CH}_3\text{C}_6\text{H}_4\text{O}=\text{(o)}$

toluino (o, m or p) $\text{CH}_3\text{C}_6\text{H}_4\text{NH}=\text{(o)}$

tolyl (o, m or p) $\text{CH}_3\text{C}_6\text{H}_4\text{CO}=\text{(o)}$

α-tolyl $\text{C}_6\text{H}_4\text{CH}_2\text{CO}=\text{(o)}$

tolyl (o, m or p) $\text{CH}_3\text{C}_6\text{H}_4=\text{(o)}$

α-tolyl = benzyl

tolyene (6 isomers) $\text{CH}_3\text{C}_6\text{H}_5=\text{(o)}$

α-tolyene = benzal

triazeno $\text{NH}_2\text{N}::\text{N}=\text{(o)}$

triazinyl (from triazine) $\text{C}_4\text{H}_2\text{N}_4=\text{(o)}$

triazon $\text{N}::\text{N}::\text{N}=\text{(o)}$

triazolyl (from triazole) $\text{C}_2\text{H}_2\text{N}_3=\text{(o)}$

trimethylene $\text{—CH}_2\text{CH}_2\text{CH}_2=\text{(o)}$

tryptophyl (from tryptophan) $\text{C}_{11}\text{H}_{11}\text{ON}_2=\text{(o)}$

tyrosyl (from tyrosine)

p-HOC₆H₄CH₂CHNH₂CO=

undecyl = hendecyl (in sense C₁₁H₂₃)

uramino = carbamido

ureido (by some used synonymously with carbamido)

—NHCONH=

valeryl $\text{CH}_3(\text{CH}_2)_3\text{CO}=\text{(o)}$

valyl (from valine) $(\text{CH}_3)_2\text{CHCHNH}_2\text{CO}=\text{(o)}$

vanillal (3,4) $(\text{CH}_3\text{O})_2(\text{HO})\text{C}_6\text{H}_3\text{CH}=\text{(o)}$

vanilloyl (3,4) $(\text{CH}_3\text{O})_2(\text{HO})\text{C}_6\text{H}_3\text{CO}=\text{(o)}$

vanillyl (3,4) $(\text{CH}_3\text{O})_2(\text{HO})\text{C}_6\text{H}_3\text{CH}_2=\text{(o)}$

veratral (3,4) $(\text{CH}_3\text{O})_2\text{C}_6\text{H}_3\text{CH}=\text{(o)}$

veratroyl (3,4) $(\text{CH}_3\text{O})_2\text{C}_6\text{H}_3\text{CO}=\text{(o)}$

veratryl (3,4) $(\text{CH}_3\text{O})_2\text{C}_6\text{H}_3\text{CH}_2=\text{(o)}$

veratrylidene = veratral

vinyl $\text{H}_2\text{C}::\text{CH}=\text{(o)}$

vinylene $\text{—CH}::\text{CH}=\text{(o)}$

vinylidene $\text{H}_2\text{C}::\text{C}=\text{(o)}$

xanthyl (from xanthene, 6 isomers) $\text{C}_{15}\text{H}_9\text{O}=\text{(o)}$

xyloyl (from xylic acid, 7 isomers) $(\text{CH}_3)_2\text{C}_6\text{H}_3\text{CO}=\text{(o)}$

xylyl (dimethylphenyl) $(\text{CH}_3)_2\text{C}_6\text{H}_4=\text{(o)}$

xylylene $\text{—H}_2\text{CC}_6\text{H}_4\text{CH}_2=\text{(o)}$

RING INDEX

The following index of *ring complexes* is arranged as shown by the bold-face figures: Class I, with single figures indicating simple rings of 3, 5, etc., members; Class II, two figures denoting double rings of 3 and 4, 3 and 5, etc., members; then the triple and still more complex rings. Under each combination of figures the kind and number of atoms in the ring or rings are expressed in formulas. These formulas are arranged so that their initial rings are in the same order as in the Formula Index (see Key at the beginning of it). If the initial rings are alike the second rings of the formula are considered, and so on. By this means the reader will be able to learn the name used in the index for the simplest parent compound containing any particular ring or combination of rings and by turning to this name in the index he will find the compounds listed and, perhaps, cross references to names of derivatives. Rings which are united but which have no atoms in common (*e. g.*, biphenyl) and "spiro" compounds¹ which are characterized by two rings having but one atom in common are not regarded as ring complexes nor included in this index.

To illustrate: **6,6,6**, $C_4N_2-C_6-C_6$ Benzoquinoxaline
 Phenazine

(1) This designates a complex ring of three components, each of six members; (2) the first is heterocyclic, containing four carbon atoms and two nitrogen atoms and the other two are carbocyclic rings of six atoms each; (3) parent compounds of this configuration will be found in the index under the two names given. If derivatives are indexed a structural formula will be found with the proper numbering and also appropriate cross references to derivs. having other common names, if any such are in the index.

It should be noted that the classification is made with reference to the smallest rings which, placed together, will constitute the plane formula. Thus hexamethylene-tetramine is treated as a 6,6,6, complex although a fourth six-membered ring (composed of atoms from the three six-membered rings) is also present.

 effect of org., on vulcanization of rubber, 1375^a.
 effect on bleaching earths, 1691^a.
 on blood vessels, 122^a.
 on catalyzed reactions, 2088^a, 2591¹.
 on concrete, 1877^a.
 on crystn. of CaSO₄, 3297^a.
 on digitalis infusion, 2358^a.
 on dye penetration into *Nitella* and *Valonia*, 1130^a.
 on growth of yeasts in bottled beverages, 982^a.
 on lactic acid content of blood, 951^a.
 on liver damage done by CCl₄, 135^a.
 on mech. strength of timber, 999^a.
 on metals, 726^a.
 on methemoglobin production by chemicals, 3964^a.
 on penetration of brilliant cresyl blue into vacuoles, 2488^a.
 on pptn. of proteins of serum, 2280².
 on proteins, peptones, polypeptides, 2,5-diketopiperazines, etc., 3911¹.
 on salivation, 3944^a.
 on starfish eggs, 2949^a.
 on substitution in benzene ring, 2465¹.
 on surface tension of Na oleate solns., 1041⁷.
 on tooth tissue, 769¹.
 on wool, 499^a.
 elec. charge reversal by H ions and by OH ions in org., 1910¹.
 elec. cond. of, in liquid NH₃, 3522^a.
 electrolytic production of org., P 3028^a.
 equil. with bases in gas phase, 3301^a.
 equil. with salts, neutral salt action in, 3524^a.
 in escaping gases in chem. industries, 2962⁷.
 esterification of—see *Esterification*.
 ethylemic linkages of, physiol. signification of, 3925^a.
 in foods, 2340^a.
 formation of, by *Aspergillus niger*, 435^a, 3212^a.
 in diabetes mellitus, 2502^a.
 in organs after death, 2935^a.
 by *Rhizopus*, 3647^a.
 in thiocyanate stiffening of muscle, 2319^a.
 -forming elements in foods, 3094¹.
 fruit, effect on fruit flavors in jellies and jams, 1318¹.
 of fruit (pear, quince, apple, loganberry, blueberry, cranberry, lemon and pomegranate), 2148^a.
 heterotri-, 1233^a.
 hydrogenation of aromatic, and their salts, 235^a, 3608^a.
 hydrogenation of unsatd. higher aliphatic, 2458^a.
 hydroxamic, 733^a.
 reaction with Br, 1100^a.
 rearrangement of geometric isomers, 3900⁷.
 hydroxy, catalytic and sp. dynamic actions of certain, 1631^a.
 detn. of, 4081^a.
 effect on fermentation, 3066^a.
 function of OH group in, 3011¹.
 intoxication—see *Acidosis*.
 iodine detn. in org., 756¹.
 ionization of, detn. of, 1580¹.
 cis-trans isomers of, bactericidal action of, 922^a.
 keto-, manuf. of, P 2479^a.
 ketonic, excretion in urine in diabetes, diet and, 3219^a.
 α-keto-, prepn. of, 1966^a, 2462¹.
 keto-, synthesis of, 3612^a.
 liberation in presence of neutral salts, 2827^a.
 manuf. of, P 3908^a.
 manuf. of insol. aliphatic, from their salts, P 3625^a.
 manuf. of monobasic, from dibasic org. acids or anhydrides, P 3625^a.
 manuf. of org., P 2274^a, P 2703^a.
 manuf. of org., from peat, P 4055^a.
 mercapto-, alkali and alk. earth compds. of, P 3716^a.
 metabolism of aromatic, 947^a, 1482⁷.
 from metal compds., P 304^a.
 in milk, formation by heating, 1854².
 mixed, 2885^a.
 mixed, analysis of, 1775^a.
 mixed, corrosion of alloys by, 3882⁷.
 of muscone, 4016¹.
 in mushrooms, 2490¹.
 neutralization curves for, 1604^a.
 neutral salt action on, 2001^a.
 in nitration of cellulose, butting up spent, 2383^a.
 non-aqueous solns. of org., 3188^a.
 from oils, etc., P 2793^a.
 optically active, 2657^a.
 org. bases and, in non-aq. solns., 1579^a.
 as organo-oxides, 3798^a.
 in oxidation of transformer oils, 1545¹.
 permeability of muscles to, 2313^a.
 in physiology, 3074^a.
 plant injuries from, in atm., detn. of, 2627^a.
 polymerization of org., detn. of, 1727^a.
 proofing, bituminous compn. for, P 3455^a.
 pump, plunger pump as, 514⁷.
 reaction of org., on PbEt₄, 1445^a.
 reactions of org., with chromic acid and KMnO₄, temp. coeffs. and, 847^a.
 reaction with feldspar and flint, 1874^a.
 reaction with gelatin, mass action in, 1392^a.
 reduction of org., 2657^a.
 removal from grape wines through warm storage, 474¹.
 salts of org., mechanism of ketone formation from, 3043^a.
 in silage, 2748¹.
 sludge—see also *Petroleum refining*.
 sludge, treating with salt soln., etc., app. for, P 3403^a.
 soly. in salt solns., 3296^a.
 solns. (non-aq.) of org., 202^a.
 solns. of strong, salting-out effect in, 2592^a.
 stabilization of, 2620².
 standardization of, 1775^a.
 borax for, 3847^a.
 with HgO and Hg, 3847^a.
 with KMnO₄, 3847⁷.
 standard solns. of, prepn. of, 2626^a.
 structure of org., and their effect on swelling, 518^a.
 sucrose hydrolysis by dil., 3300^a.
 sucrose inversion by strong, 1580^a.

- sugar, 2,5-anhydro, optical rotation of, 3892¹.
 from sugars, constitution of, 1966⁸.
 sulfamyl carboxylic, alk.-earth salts of alkali metal derivs. of *N*-halo derivs., P 593⁸.
 sulfur—see *Sulfur acids*.
 surface e. m. f. of, 2418¹.
 swelling of collagen in mineral, 3059⁸.
 tar—see *Tar acids*.
 taste of, H-ion concn. and, 3059⁸.
 taste of, physico-chem. basis of, 1297².
 thiocarboxylic, and esters, 2458⁷, 3009².
 thio, oxidation of org., 52⁷.
 titration of, effect of gelatin on, 3848³.
 titration of weak, 872⁴.
 unsatd. aliphatic, of fish oils, 223⁹.
 unsatd., 1 addn. to, 2458⁴.
 α , β -unsatd., prepn. of, 2661⁴.
 unsatd., rearrangements of, 1637¹.
 in water for drinking, effect on urinary output of water, chloride, inorg. phosphate, urea and NH₃, 2140⁴.
- Acid value.** See *Acid number*.
Acocanthera ouabala, ouabain in, 2357⁴.
Aconic acid (4,5-dihydro-5-keto-3-furancarboxylic acid).
 —, 2,4-dimethyl-, and derivs., 385⁹.
Aconite, alkaloids of, 4017⁴.
 ext. of, assay of, 986¹.
 liniment, 3709².
 standardization and stabilization of preps. of, 4024⁹.
Aconitic acid, soly. in liquid NH₃ and in liquid SO₂, 3047⁸.
Aconitine, effect on body temp., 1678⁹.
 effect on Purkinje's fibers, 281¹.
 effect on respiration and circulation after breathing O.-dild. air, 2739⁴.
- Acorus gramineus**, oil of, 2049⁴.
Acridan (5,10-dihydroacridine).
 —, 3-acetamido-7-dimethylamino-5,5-diphenyl-, 2268⁸.
 —, 3-amino-7-dimethylamino-5,5-diphenyl-, 2268⁸.
 —, 3-amino-5,5-diphenyl-, 232⁹.
 —, 1,3-diamino-5,5-diphenyl-, 2268⁸.
 —, 1,7-(and 3,7)-diamino-5,5-diphenyl-, 232⁹.
 —, 3-dimethylamino-5,5-diphenyl-, -HCl, 2268⁸.
Acridinamic acid, 2697².
Acridinanilic acid, 2697².
Acridinanilide, 2697².
Acridine,

 amino derivs. of, and some related compds., 4072⁹.
 derivs., P 262¹, P 2360⁷.
 derivs., as germicides, 3055⁸.
 soly. in liquid NH₃ and in liquid SO₂, 3047⁸.
 —, 1-amino-, 2903⁸.
 —, 3,5-bis(*m*-aminobenzamido)-7-ethoxy-, pharmacol. action of, 2936⁸.
 —, 3,5-diamino-3,7-diethoxy-, P 593⁸.
 —, 3,7-diamino-3,5-dimethoxy-, P 593⁸.
 —, 3,5-diamino-8-ethoxy-, P 2360⁷.
 —, 8,10-dihydro-. See *Acridan*.
 —, 3,5-dihydro-3-imino-. See *Carbasime*.
 —, dihydroketo-. See *Acridone*.
 —, 5-(*p*-dimethylaminophenyl)-3-nitro-, melting point of, 2903⁸.
 —, 4-ethoxy-, 1461⁷.
 —, hydroxy-. See *Acridol*.
 —, 1-(and 3)-methyl-, 1815⁴.
 —, 5-methyl-, salts, 1810¹.
 —, 1-(and 3)-nitro-, 1815⁴, 2903⁸.
1-Acridinesulfonic acid, 4-hydroxy-, 1461⁷.
 —, 4-hydroxy-3-iodo-, 1461⁷.
Acridinic acid (2,3-quinolinedicarboxylic acid), and derivs., 2698⁹, 2697^{1,2}.
Acridinic anhydride, 2697².
Acridinimide, 2697².
 —, *N*-phenyl-, 2697².
Acridinium compounds, 2,8-diamino-3,7-diethoxy-10-methyl--chloride, P 593⁸.
 4-ethoxy-10-methyl--methosulfate, 1461⁷.
4-Acridol, and salts, 1461⁷.
5(10)-Acridone, 3-acetamido-, 232⁹.
 —, 2-bromo-8-nitro-, 3905².
 —, 2-chloro-8-nitro-, 3905².
 —, 4-ethoxy-, 1461⁷.
 —, 4-hydroxy-, 1461⁷.
Acridonium compounds. See *Acridinium compounds*.
Acriflavine, as disinfectant for biliary passages, 800⁸.
 trypanocidal action of, effect of paraformal on, 2316¹.
Acroclididum mahuba, trilaurin in seed of, 1365⁴.
Acrolein (*acrylic aldehyde*), acetal formation with, 3888³.
 colloids from, fractures of, 1044⁸.
 condensation products from, P 307⁸.
 condensation with 2-aminopyridine, 94⁸.
 —, α -bromo-, and semicarbazone, 2659³.
 —, β -2-furyl-. See *2-Furanacrolein*.
 "Acrolite", 659².
Acromegaly, blood Ca in, 3955⁴.
 metabolism in, 2930⁷.
Acrylaldehyde. See *Acrolein*.
Acrylic acid, manuf. of, P 3625⁸.
 polymerization of, effect on x-ray diagram, 1730⁴.
 prepn. of, 2661⁴.
 —, β -anilino-, ethyl ester, 55⁸.
 —, β -benzoyl-, mixed anhydrides of, 2259^{3,4}.
 reaction with phenols, 2859⁸.
 —, α -benzoyl- β -ethoxy-, ethyl ester, 1266⁷.
 —, β -carbomethoxyamino-, 2874⁸.
 —, β -carboxyamino-, disodium salt, 2875⁸.
 —, β -diethylamino-, ethyl ester, 55⁸.
 —, β -(3,4-dimethoxyphenyl)- β -(3,4,5-trimethoxyphenyl)-(7), 1981².
 —, β , β -dimethyl-. See *Seneciolic acid*.
 —, β , β -dipropyl-. See *α -Hexenic acid*, β -propyl-.
 —, β -ethyl-. See *α -Pentenic acid*.
 —, β -furyl-. See *Furanacrylic acid*.
 —, α -hydroxy-. See *Pyruvic acid*.
 —, α -phenyl-. See *Atropic acid*.
 —, β -phenyl-. See *Cinnamic acid*.
 —, β -piperidyl-. See *Piperidineacrylic acid*.
 —, β -pyrrol-. See *Pyrroleacrylic acid*.
 —, β -quinolyl-. See *Quinolineacrylic acid*.
Acrylophenone, β , β -dimethyl-. See *Seneciophenone*.
 —, β , β' -dimethylhydrazobis-, 1450⁷.
 —, β -hydroxy-3,4-(and 3,4)-dimethoxy-, copper derivs., 3620^{3,4}.

- , *β -methyl-*. See *Crotonophenone*.
 —, *β -[α (or β)-(p-nitrophenyl)hydrazino]-*, and *p-nitrophenylhydrazone*, 1450⁴.
 —, *β -phenyl-*. See *Chalcone*.
 —, *β -phenylazo-*, 1450⁴.
 —, *β -[α (and β)-phenylhydrazino]-*, 1450⁴.
Actamine, 2150⁸.
Actinia, *equina*, compn. of, 612⁴.
 reaction velocity of, in presence of alkaloids and of gland exts., 1152⁴.
Actinism. See *Light*; *Photochemistry*.
Actinium, atomic wt. of, 1926⁸.
 particles of long range emitted by active deposit B + C of, 856².
Actinium series, 3821¹.
Actinomyces, *colorata*, effect on *C. folia*, 935⁶.
Activated sludge. See *Sewage*; *Waste*.
Activation. (See also *Heat of activation*.)
 of ammonia, 3024⁷.
 of atoms and mols., theory for, 1046⁷.
 of complex mols. by collision, 1047⁸.
 by collision, 2207⁶.
 by collision, mol. induction in, 2612⁴.
 contact, of H by metals, 3012³.
 energy of, of halogen compds., 3009².
 in gaseous systems, 3313⁸.
 of gases by adsorption, 2088³, 2835¹.
 of mols., theory of, 3832⁸.
 optical—see *Optical rotation*.
 radiation theory of, 3313⁷.
Active deposits, of actinium, particles of long range emitted by, 856².
 of thorium, 2 positive substances in, 2600⁷.
Activin. See *Chloramine-T*.
Activity, of chlorine at various partial pressures, 1919¹.

 combustible vapors in, app. for detn. of, 3001⁴.
 compn. of, mol. no. and, 1907¹.
 condenser, dielec. loss and dielec. const. for, 3824³.
 corrosion by, steels resisting, 2245⁴.
 crit. const. of, 1036².
 dehydrating, in food containers, etc., absorbent for, P 782³.
 density of, 1381³.
 density of, variations in, 679¹.
 detn. in gas, app. for, 2782⁴.
 dielec. const. of, detn. of, 1586⁴.
 disson. study on, at high temps., 3800⁴.
 distributor for drop method of dehydration, 1282³.
 double refraction of, in magnetic field, 358².
 drying, P 3693¹, P 3995⁴.
 drying, adsorbents for, P 2363⁷.
 in drying app., thermoregulators for, P 3286³.
 dust detn. in, 1946⁵.
 dust sepn. from, app. for, P 2202⁴.
 effect on surface tension of liquids, 6⁴.
 elec. corona discharge in, ionization in, 1936².
 elec. glow discharge in, 2842³.
 elec. glow discharge in, study with exploring electrode, 2424³.
 elec. spark in, 2847³.
 electromotive force at boundary between solns. of aliphatic compds. and, 2418¹.
 electrostriction in, 524⁵.
 elements of, effect of elec. discharge on, 1050⁴.
 ethyl iodide detn. in, 2712¹.
 expansion by heat, expts. and studies of Volta on, 3534⁴.
 filters for, P 2403⁴, P 3144⁴, P 3493³.
 flow of, app. for controlling, P 1208¹.
 fumigating or deodorizing, app. for, P 786⁷.
 heat capacities of, as function of pressure, 1732⁴.
 heater for, P 2579².
 heating, elec. furnace for, P 362⁴.
 humidity of—see *Humidity*.
 hydrogen detn. in, P 722⁴.
 hygroscopicity of, in relation to motor alc., 4045⁵.
 interface with soln., measuring p. d. with Hg dropping electrode, 203⁴.
 for internal-combustion engine fuel mixts., control of temp. of, P 3265⁴.
 ionization and luminosity produced by stationary elec. oscillations in, 3824⁴.
 ionization energy of, 1406³.
 ionization obtained by bubbling, through solns., 2099⁴.
 ionized, effect on assimilation and respiration of leaves, 3215⁴.
 ionized, effect on growth of barley seedlings, 3215⁴.
 ion, mobility in air, 2603⁷.
 ion, transformation period of initial positive, 1753⁴.
 Joule-Thomson effect for, 355⁷, 851³, 4.
 liquefaction and rectification of, P 617⁴, P 1320⁴, P 2039¹, P 2749⁴, P 3095⁷.
 liquefaction and rectification of, app. for, P 144⁴, P 201⁴, P 1208¹, P 2578⁴.
 liquefaction, cooling, and sepn. of, system for, P 783³.
 liquefaction of, app. for, P 344¹.
 liquefaction of, explosions in, 2762⁴.
 liquid—see also *Explosives*.
 liquid, baths, thermoscope for, 1033⁴.
 high-vacuum distn. with, 350⁴.
 treating with gases, app. for, P 1208².
 magnetic susceptibility of, 1921².
 of mines—see *Mines*.
 mixing app. for gas and, safety device for, P 838⁴.
 mixing in spaced jets with gaseous fuel, P 3265³.
 mixing with liquid fuels for combustion, P 2181⁷.
 mixts. with NH_3 and with SO_2 , adsorption by $Fe(OH)_3$ gel, 2585⁵.
 monomol. ions in, 531⁴.
 nitrogen peroxide detn. in, 1608³.
 oxygen-dild., effect on respiration and circulation and effect of drugs thereon, 2739³.
 oxygen-enriched, effect of breathing, during exercise on respiration and on lactic acid content of blood and urine, 1293⁴.
 oxygen-enriched, production of, 2046².
 oxygen tension of inspired, 1670¹.
 ozonizing—see *Ozone*.
 phys. const. at low temp., 2582¹.
 pollution of, measurement of, 4000³.
 preheaters for boilers, 1535⁴, 2056⁴.
 preheating, 2516⁴.
 preheating in steam boilers, 2516⁴.
 pressure of, in discharge tubes, 3155⁴.
 purifying, P 466⁷.
 purifying and humidifying, app. for, P 2822³.
 purifying compressed, app. for, P 198³.
 purifying substances, vaporizing app. for, P 344¹.
 radon content of sea, 3152⁴.
 refractive index of, pressure and, 2217⁷.
 removal from boiler-feed water, app. for, P 620⁴.
 removal from liquids, app. for, P 838³.
 removal from water, P 620³.
 respiration in compressed, He in, 2342⁷.
 sepg. liquid particles from, app. for, P 1208¹.
 sepn. of O and N from, 3993³.
 supply regulation, etc., of drying and enameling ovens, P 3144⁴.
 supply to furnaces, app. for regulating, P 2403⁴.
 system: N_2O-Et_2O -, explosion regions of, 1215⁷.
 systems: CO_2-CCl_4 -, and $H_2-C_6H_5Br$ -, 3301⁴.
 thermal cond. of, 2206⁷, 2825⁴.
 viscosity of, 2825⁴.
 viscosity of, effect of temp. on, 204³.
 vol. control of, 3691⁴.
Air-gas. See *Gas, illuminating and fuel*.
Air pump. See *Pumps*.
Aktivin. See *Chloremine-T*.

- Aktoprotein**, gonorrhea treatment with, 20327.
- Akuamine**, and salts, 3623^{1,3,4}.
- Alaite**, from Ferghana, 3584⁴.
- Alaninamide**. For derivs. see under *Pro-pionamide*.
- , β -phenyl-. For derivs. see under *Hydrocinnamamide*.
- Alaninanilide**, β -phenyl-. For derivs. see under *Hydrocinnamanilide*.
- Alanine** (α -aminopropionic acid). (See also β -Alanine.)
- compd. with serine, constitution of, 846³.
- dl*-, reaction with sugars, 737¹.
- dl*-, sweetness of, 919¹.
- in diabetic liver, behavior of, 2000⁷.
- effect on blood pressure, 2933³.
- on fermentation by yeast, 9257¹.
- on insulin hypoglycemia, 2327⁷.
- on plant respiration, 2918¹.
- on respiration, 453⁷.
- hydrolytic properties of, 3373⁴.
- reaction with *d*-glucose, 373⁷.
- reaction with sugars, 426⁴.
- specific dynamic action of, 1143⁴.
- , *N*-alanyl-, effect on fermentation by yeast, 9257¹.
- spectrum of, 567³.
- , *N* - (α - benzamidocinnamyl)-, and ethyl ester, 1813⁴.
- , β - (p - carbethoxyoxyphenyl) - *N*-formyl-, spectrum, 2260⁴.
- , *N* - carboxy - β - phenyl-, anhydride—see *2,5-Oxazoledione, 4-benzyl-3,4-dihydro-*.

- , β -mercapto-. See *Cystine*.
- , *N*-(*N*-methylalanyl)-, prepn. and hydrolysis of, 100⁴.
- , phenyl-, combustibility of, 950³.
- effect on blood pressure, 2933³.
- on kidneys (denervated), 3971¹.
- on sp. dynamic action of protein, 2725¹.
- hippuric acid formation from, in animal organism, 1661³.
- pharmacol. action of, under influence of purine diuresis, 3971¹.
- , β -phenyl-, addn. compd. with *p*-phenylazophenol, 68⁴.
- d*- and *l*-, synthesis of, 61².
- optical properties of, 1932¹.
- , β -salicyl-. See *o*-Tyrosine.
- , *N*-sarcosyl-, prepn. and hydrolysis of, 100⁴.
- β -Alanine**, in cleavage products of muscle proteins, 105².
- prepn. of, 2663³.
- , *N*-glycyl-, ethyl ester, 2663³.
- , α -hydroxy-. See *Isoserine*.
- , *N* - methyl - *N* - phenylsulfonyl-, behavior in animal body, 258².
- , β -phenyl-. See *Hydrocinnamic acid, β -amino-*.
- Alanine anhydride**. See *2,5-Piperazinedione, 3,6-dimethyl-*.
- Alarm device**, temp.-controlled, P 3494¹.
- Alaskalte**, from Bolivia, 3329².
- Albertoles**, lacquers from, 3136³.
- Albert 102**, treatment of mouse recurring fever with, 2935³.
- Albite**, 878¹.
- compn. of, 1782³, 3860⁷.
- dispersion of, 1610³.
- Albrecht-Ulzer**, halogen soln. of, 3420³.
- Albsapogenin**, 1463⁷.
- Albumin**. (See also *Albumin preparations*.)
- acid-binding by egg, effect of salt concn. on, 920².
- acid de-albuminization, 3635².
- acids and, 3059³.
- antigenic character of denatured, 2728³.
- in blood after nephrectomy, 3076².
- of blood plasma in dogs, 3946¹.
- of blood serum, arginine content of, 3633¹.
- in blood plasma in acute and chronic nephropathies, 451¹.
- effect of ultra-violet rays on, 3970³.
- reaction with colloidal Au, 1999³, 2480².
- reaction with glucose and fructose, 3629³.
- sp. activity of hemolytic, 2504³.
- sp. refraction of, 1278³.
- in blood serum as cancer test, 1842⁷.
- carbon assimilation from egg, 1836³.
- in cerebrospinal fluid in uremia, 2931¹.
- coagulation of egg, by heat, 420³.
- coagulation of mixts. of globulin and, 3633³.
- combustibility of egg, 950³.
- constitution of, 897².
- crystn. of egg, effect of cold on, 2141⁷.
- crystals, Röntgen-ray measurements of, 923³.
- degradation of egg, by hypobromite, 3892².
- denaturation by weak acids in presence of salts, 1662².
- denaturation of, "protein error" and, 3642⁷.
- density and optical rotatory power of solns. of, 3914⁷.
- detection and detn. of, neutral salt action on, 2001¹.
- detection in plants, 2293¹.
- detection in urine, 2286².
- detn., 2445³, 3642³.
- detn. in cerebrospinal fluid, 1471⁴.
- in cerebrospinal fluid in meningitis, 1674³.
- in urine, 2709³.
- detn. of, by "protein error," 3915⁴.
- of developing egg, physico-chem. changes in, 1836⁷.
- diffusion velocity of egg, 2275⁴.
- effect on taste of sucrose, 4088³.
- egg, as food, effect of drying on, 3072³.
- electrolyzed sero-, reaction with colloidal Au, 1132³.

- excretion in nephritis, 3392^a.
 of flour, prepn. and analysis of, 2512^a.
 -globulin fraction of tubercle bacillus, 434^a.
 -globulin quotient, effect on osmotic pressure of serum, 128^a.
 -globulin ratio in liquid of edema, 2030^a.
 glucemia from injection of egg, 1141^a.
 glutin flocculation by, 2280^a.
 heat denaturation of egg, H-ion concn. and, 748^a.
 heat effect on, 924^a.
 from horse plasma, compn. of, 754^a.
 hydrogen-ion concn. of egg, and blood-serum, detn. with neutral red and phenol red, 2913^a.
 hydrogen-ion concn. of egg, in relation to its germicidal action, 3230^a.
 hydrolysis of, 3627^a.
 hydrolysis of, by pepsin, effect of backward reaction in, 2483^a.
 hydrolysis of, by pepsin, effect of colloidal S on, 108^a.
 hydrolysis of egg, by pepsin, 1131^a.
 hypersensibility to, 958^a.
 ionization of egg, effect of salts on, 3635^a.
 isoelec. point of, effect of Wiesbaden hot spring water on, 2280^a.
 lysozyme of egg, 750^a.
 mol. aggregate of, visibility of, 421^a.
 mol. wt. of egg, 746^a.
 nitrogen and C of egg white and wheat, assimilation of, 1832^a.
 optical rotation and dispersion of various forms of, 2278^a.
 osmosis with collodion membranes of egg, kinetics of, 3295^a.
 ovalbumin, arginine content of, 3633^a.
 diffusion in aq. media, 422^a.
 effect on rate of clearing of suspensions of coarse particles in solns., 3785^a.
 mol. wt. in phenol, 345^a.
 parenteral introduction of, effect on blood serum, 1295^a.
 α-phlothion in egg, 950^a.
 for photomech. printing surfaces, P 4036^a.
 prepn. and pptn. reactions of egg, 3950^a.
 prepn. of, P 2363^a.
 removal from antidiphtheric serum, 959^a.
 sources of, in ancient Egypt, 1209^a.
 spectrum of, 3914^a.
 sulfur in suprarenals after injections of, 2311^a.
 urinary, hydrolysis of, 109^a.
 vegetable, extrn. of, P 3433^a.
 vitamin B content of com. egg, 1202^a.
 yeast complement replacement with pepsin digest of egg white, 1278^a.
- Albumin A reaction**, cancer diagnosis with, 1675^a.
- Albuminocholia**, 3079^a.
- Albuminous substances**, book: Eiweisskörper und Kolloide, 3377^a.
 effusions from injection of, sugar content in, 1492^a.
 molding compn. of cellulose derivs. and, P 806^a.
 in plastic material manuf., 1335^a.
 precipitation in must manuf., effect of K bitartrate and of tartaric and malic acids on, 2526^a.
 review, 2283^a.
- Albumin preparations**, iodated, effect on catalase of blood, 3944^a.
 mercury, 1868^a.
- Albuminuria**, acidosis and, 2153^a.
- Albunoid degeneration**, of cartilage (tracheal), 3662^a.
- Albumoses**. (See also *Proteoses*.)
 Bence-Jones, 1998^a.
 of blood, esp. in catarrhal icterus, 452^a.
 from placenta in nephrosis of pregnancy, 3670^a.
 in silver proteinates, 1689^a.
- Albumosuria**, urinary excretion of mineral elements in, 3952^a.

- Alchemy**, ancient and modern, 199^a.
 Babylonian origin of, 516^a.
 Chinese, 677^a.
 Tabula smaragdina, 345^a.
- Alcoholates**, alkali, addn. compds. with esters, 734^a, 1628^a.
 complex metal, P 3369^a.
 of magnesium, prepn. of, 3170^a.
 manuf. of, P 2906^a.
 reactions with aldehydes, ketones, and esters, 3346^a.
- Alcholemlia**, after ingestion of alc. beverages or of sucrose, 2031^a.
- Alcoholism**. See *Ethyl alcohol*.
- Alcohols** (*Entries referring to Ethyl alcohol*.
 Methanol, and other simple alcohols will be found under these common names.
 Complex aliphatic alcohols are indexed under the Geneva names (see Ethanol, Propanediol, etc.). Aromatic alcohols containing one or two aromatic radicals will be found under Benzyl alcohol and Benzohydrol, respectively, rather than under Carbinol. Alcohols containing three aromatic radicals, however, will be found under Carbinol.)
 adsorption on charcoal, 351^a.
 alkyl carbonate formation in aq. solns. of, 2091^a.
 amino-, and their acyl derivs., synthesis of, 567^a, 568^a.
 amino-, deamination of, 908^a.
 amino-, deamination of tertiary, 1977^a.
 from autolysis of yeast in sucrose, 151^a.
 boiling pts. of, cohesive forces and, 1727^a.
 carbamyl chloride derivs. decompd. by, 1108^a.
 catalytic action on primary aliphatic, 803^a.
 chem. constitution of, effect on velocity of hydrolysis of esters, 387^a.
 from coal-distn. gases, P 2978^a.
 cyclic, catalytic dehydration of, 570^a, 571^a, 3181^a.
 dehydrogenation of, P 3626^a.
 by destructive decompn. of waste cellulose liquor or other org. materials, P 321^a.
 detection of, 372^a.
 detn. in animal organism, 417^a.
 in EtOH, 2528^a.
 in oil of citronella, 2960^a.
 in oils, 153^a.
 in org. solvent mixts., 3581^a.
 dihydric—see *Glycols*.
 effect on coagulation of dispersoid solns., 3516^a.
 on coagulation of hemoglobin, 3660^a.
 on intestines, 3974^a.
 elec. coherence of, heat of adsorption and, 2828^a.

- esters of terpene, P 3425⁹.
 ethers of aromatic, prepn. of, 737¹.
 explosions of higher, 1185⁴.
 by fermentation, P 1517⁷.
 formation from sugar by electrolysis, P 530⁸.
 germicidal activity of monohydric, chem. constitution and, 935⁴.
 halogenated, from halogenated aldehydes, P 1464⁴.
 higher, as fermentation products, 980⁸.
 higher, from CO and H, 639⁷.
 hydroaromatic, detn. of, 547¹.
 hydroaromatic, isomerism of, 374⁴.
 identification of, 405¹.
 ignition temp. of, 2079⁶.
 internal surface of charcoal as detd. by adsorption of aliphatic, 2208².
 manuf. of, P 249³, P 592^{5,7,8}, P 1128⁴, P 2274^{3,4}, P 2703⁴, P 3369⁴, P 3908⁶.
 manuf. of aliphatic, review on, 1810¹.
 manuf. of higher, P 3908^{2,3}.
 mixts. with hydrocarbons, crit. dissoln. temps. of, 3297⁵.
 mol. space array in liquid primary normal, 2206⁹.
 from olefins from cracking petroleum, P 818⁹.
 as organo-oxides, 3798⁸.
 oxidation in light as photochem. phenomenon, 1761⁹.
 oxidation of, P 1416¹, 3345⁴.
 oxidation (photochem.) of, 3024⁸.
 oxidation to aldehydes or ketones, catalysis with ZnO, 2080⁹.
 oxidation with elec. current, P 2438⁸.
 by oxidizing oils, P 1546⁸.
 from paraffin wax oxidation, 171².
 in perfumery, 2530².
 pharmacology of, 2738⁸.
 polyhydric, partial esterification of, 1096².
 polyhydric, reaction with SOCl₂, 1796⁸.
 prepn. of primary from sec., 387².
 reaction with aromatic compds. in presence of AlCl₃, 1982⁹.
 reaction with epichlorohydrin in presence of catalysts, 223⁴, 567¹.
 reactivity of the OH-H atom in, 3887⁷.
 reduction of, 2657⁹.
 Röntgen-ray diffraction in primary normal, 3549⁷.
 sepn. of, P 2273⁸.
 solidifying, P 3434¹.
 soly. of Na benzoate in, surface tension and, 3781⁸.
 from spermaceti and sperm oil, 564⁸.
 of sperm oil, 3278².
 surface e. m. f. of, 2418¹.
 terpene, esters of, P 593¹.
 terpenic, dehydration by Japanese acid clay, 1259⁸.
 thermal constns. of systems with alkyl halides, formulas for calcn. of, 2092⁸.
 unsatd., reaction with PBr₃, 1795⁴.
 unsatd., substitution in, 3902⁴.
 Walden inversion of secondary, 72⁸.
 from water gas, 2371².
 from water gas, equil. in formation of, 2783⁴.
- Aldebaranium.** See *Neo-ytterbium*.
Aldehyde. See *Acetaldehyde*.
Aldehyde-ammonia, prepn. of, 3712⁴.
Aldehydes. (See also *Phenol condensation products*.)
 of aliphatic series in perfumery, 2355⁸.
 amines from, 2669¹.
 aminono, 2257⁹.
 aromatic, 1452¹.
 bisulfites, constitution of, 223⁴, 386⁵.

 α-bromo-, synthesis of, 1796¹.
 carbonyl group detn. in, 2452¹.
 color reactions of phenols with, 4018⁸.
 compds. of aromatic, with dimethyl 1,3-cyclohexanedione, 2253¹.
 condensation of aliphatic, with 2-amino-pyridine, 94⁸.
 condensation of aromatic, with 1,4-imidazo-pyridin-3(2)-one, 1264⁸.
 condensation of aromatic, with 2-nitro-fluorene, 3362².
 condensation of, to esters under influence of Al(OEt)₃, 387⁷.
 condensation products with urea, P 805⁹.
 condensation with ketones, 3599⁸.
 condensation with α,α'-thiobisacetophenone, 2883^{3,8}.
 cyclic, for perfumes, 1690¹.
 decompn. of complex, 576².
 by destructive decompn. of waste cellulose liquor or other org. materials, P 321⁸.
 detection in Et₂O, 4028².
 detn. in EtOH, 2526⁸.
 effect on intestines, 3974⁸.
 enzymic transformation of, 594⁸, 1820⁹.
 ethyl alc. contg., for lighting, 167⁸.
 in ethyl ether, 2759⁸.
 halogenated, alics. from, P 1464⁴.
 heterocyclic compds. with, color reactions of, 875².
 α-hydroxy-, 3608³.
 hydroxy aromatic and their ethers, condensation with 2 butanone, 1803⁴.
 o hydroxy, condensations with benzoyl-acetonitrile, 378⁷.
 condensations with 2-butanone, 3196⁹.
 condensation with α-alkyl-β-ketonic esters, 2900⁷.
 hydroxy-, Gattermann synthesis of aromatic, mechanism of, 1256².
 hydroxymethylene, 2259⁹.
 keto-aldehyde mutase in wheat, rye and soy-bean seeds, 3633⁴.
 ketones from, 571⁴.
 δ-keto-, tautomerism of, 3043⁹.
 manuf. of, P 2274^{4,5}, P 2703⁴.
 manuf. of aromatic, P 1272⁷, P 3058⁹.
 from oils, etc., P 2793³.
 oxidation of, 3345⁴.
 activation of O during, 1582⁷.
 with elec. current, P 2438⁸.
 by xanthine oxidase, 420⁸.
 oxidation of alics. to, catalysis with ZnO, 2089⁹.
 α-oxides from, 53⁹.
 by oxidizing oils, P 1546⁸.
 in perfumery, 2530².
 phenolic, acyl migration in partial sapon. of acylated, 1107⁸.
 phenolic, Perkin reaction and, 1257⁸, 2463¹.
 plant nutrition with, 115⁸, 942⁴.
 reaction of aromatic, with some cyclanones, 570⁸.
 with S, 2472⁴.
 with their cyanohydrins, 1984⁹.
 reactions with alcohols, 3346⁴.
 reactions with azo compds., 1801³.
 reactions with magnesylindoles, 1117⁹.
 reduction of, 2657⁹, 3188⁸.

- relaxation of histamine contractions in smooth muscle by, 3959¹.
 surface e. m. f. of, 2418¹.
 synthesis of, 731¹.
 vitamin content of foods in relation to, 2742⁷.
- Alder**, bark of *Alnus viridis*, compn. of, 600¹.
 bark of black, compn. of, 937⁸.

 compn. of, 2157².
 decompn. in soil, food substances from, 1514⁷.
 fertilizer expts. on, 471⁴.
 growth of, 3386⁴.
 growth of, H-ion concn. and, 2489⁶.
 hay, compn. and feeding value of, 3094⁴.
 hay, net-energy values of, 3936⁹.
 inoculation of, on lime-deficient sandy soils, 3700².
 meal, decompn. by mixed and pure cultures of microorganisms, 1512².
 nitrogen content of, 1862⁸.
 nitrogen metabolism of steers on rations contg., as sole source of N, 1480⁷.
 nutrient media for, 977⁹.
 nutrient removal from subsoil by, 4004⁹.
 silage, preservation of, 3689⁴.
 soil reaction of fields growing, 3245⁶.
- Algae**. (See also *Laminaria*; *Plankton*; *Seaweeds*; *Water, purification of*.)
 carotenoid pigments of, 2146⁷.
 chemistry of marine, 117².
 fat in, 3913⁹.
 potassium/sodium ratio in, 3069⁴.
 respiration and fermentation in, 3384².
 in rice fields, combating with CuSO₄, 3101⁴.
- Algin**, dyeing reserves by means of, 2801⁴.
 molding and hardening material contg., P 1614.
 from seaweed, 159².
 for sizing or coating, P 2054².
- Alginates**, utilization of, 2963¹.
- Allicyclic systems**, formation and stability of associated, 1103⁹.
- Alimentary canal**. See *Digestive tract*.
- Aliphatic acids**. See *Acids*; *Fatty acids*.
- Aliphatic alcohols, aldehydes, etc.** See *Alcohols*; *Aldehydes*; etc.
- "Alite,"** of hydraulic cement clinker, 999².
- Alizarin** (*1,2-dihydroxyanthraquinone*), color change of, effect of hydrophilic colloids on, 3575².
 and derivs., manuf. of, P 414⁴.
 diglucoside, 2904⁴.
 as disinfectant for biliary passages, 800⁹.
 monoglucotetraacetate⁸ and its acetate, 2904⁴.
 prepn. of, 910⁷.
 reaction with (AcO)₂Cu, 2208⁷.
 synthesis of, 1813².
- Alizarin dyes**. See *Dyes*.
- Alkali cellulose**. See "alkali" under *Cellulose*.
- Alkalies**. (See also *Bases*.)
 action on bleaching earths, 1691⁶.
 action on gelatin, 3892⁹.
 adsorption and osmosis in gelatin gel with and without addn. of lecithin, 2410⁸.
 adsorption by Fe(OH)₃, 2827⁴.
 adsorption by starch and cellulose, velocity of, 1736⁴.
 in blood serum of infants, 1844⁵.
 buret for, 1569⁴.
 burns, treatment of, 3014¹.
 chronic hydroxide soly. in, 1939¹.
 from complex salts contg. F, P 629⁹.
 compds. with casein, formation and ionization of, 2910¹.
 containers for, P 2536⁶.
 decompn. of diacetone alc. in solns. of alkali salts and, 688⁹.
 detn., 3577⁴.
 detn. in Dakin's soln., 431⁸.
 in glass, 2771⁸.
 in glasses and minerals, 3327⁷.
 in ores, 2449⁸.
 in soaps, 665¹, 1721⁴, 4082⁹.
 detn. of, neutralization in, 2856⁶.
 detn. of, thiosulfate as indicator in, 2626⁴.
 diet contg. excess of, effect on kidney, 436⁹.
 dissoln. of Al in, kinetics of, 3525⁴.
 effect on blood sugar, 2326⁴.
 on CO hyperglucemia, 960².
 on crystn. of CaSO₄, 3297².
 on heart, 1312⁹.
 on heart in ether anesthesia, 1848².
 on interfacial tension between oil or org. solvent and water, 3147⁴.
 on iron baths, 1951².
 on lactic acid content of blood, 951⁴.
 on methemoglobin production by chemicals, 3904⁹.
 on oxidation of Fe(OH)₃ with air, 1744⁷.
 on oxidation of Na₂SO₃ with air, 2089⁹.
 on oxidation of SnCl₄ with air, 3299⁹.
 on proteins, peptones, polypeptides, 2,5-diketopiperazines, etc., 3911⁷.
 on salivation, 3944².
 elec. cond. of, 2590².
 evapn. of, heat consumption in, 2749².
 furnace for recovering, lining for, P 1338⁴.
 fusion of, speeding app. for, P 2402².
 industry, 3834⁹.
 liberation in presence of neutral salts, 2827⁴.
 manuf. of, P 304⁸, P 3107⁷.
 manuf. of, by electrolysis, P 2439^{2, 3}.
 by electrolysis, graphite anodes in, 2849¹.
 by electrolysis, review on, 1413⁹.
 mixts. with Fe used as catalysts in synthesis of NH₃, thermionic emission from, 2425⁷.
 neutralization with H halides, fog in, 2829⁴.
 permeability of muscles to, 2313⁹.
 plant tolerance to, 978².
 reaction with glyoxals, 2877⁴.
 recovery of, diffusion app. for, P 478⁷.
 sensitizing action of, 769⁹.
 in soils, formation of, 2522⁹.
 sorption by starch, 2208⁷.
 standardization with KH(IO)₃, 367⁴.
 standards for solns. of, 3847².
 as sulfite liquor bases, 1350⁷.
 swelling of cotton and viscose silk with, 1358².
- Alkali metal alloys**, amalgam, prepn. of, electrolytically, 3563⁷.

- Alkali metal alumino-tartrates**, polarimetric and electrometric study of, 3321^a.
- Alkali metal antimonates**, manuf. of, P 304^a, P 1526^b.
properties of, 1579^a.
- Alkali metal arsenates**, manuf. of, P 304^a, P 305^a, P 1526^b.
- Alkali metal borates**, in water soln., 3325^a.
- Alkali metal bromides**. (See also *Alkali metal halides*.)
reaction with CuBr_2 , 2238^a.
- Alkali metal carbonates**, from complex salts contg. F, P 629^a.
equil. in solns. of, 2214^a.
formation from chlorides by $\text{H}_2\text{C}_2\text{O}_4$, 3852^a.
heat of reaction with Mg and Al, 3572^a.
- Alkali metal chlorides**. (See also *Alkali metal halides*; *Chlorides*.)
adsorption by activated C, 1042^a.
carbonate formation from, by action of $\text{H}_2\text{C}_2\text{O}_4$, 3852^a.
complexes with HgCl_2 , affinity of, 3010^a.
conversion into nitrates with production of Cl, 3712^a.
copper detection in, 2052^a.
electrolysis of, P 2439^a, 3834^a.
electrolysis of, graphite anodes in, 2849^a.
manuf. of, P 992^a.
manuf. of, review on, 1413^a.
mixts. with alk. earth chloride, min. toxicity to plants, 2491^a.
spectrum (Röntgen) of, chem. constitution and, 1929^a.
systems: $\text{CoCl}_2\text{-H}_2\text{O}$ -, 1398^a.
- Alkali metal chromates**, from alloys, P 2764^a.
from chrome ore, P 3108^a.
- Alkali metal compounds**. (See also *Potassium compounds*, etc., as well as definite alkali metal compounds, as *Sodium chloride*. Also *Alkali metal salts*.)
in blast furnace, 3867^a.
recovery from waste liquor of paper manuf., P 822^a.
- Alkali metal cuprotartrates**, dichroism of, 3325^a.
- Alkali metal cyanates**, ammonia production by hydrolysis of, 2705^a.
- Alkali metal cyanides**. (See also *Cyanides*.)
in blast furnace, 1428^a, 3868^a.
from cyanide and from K ferrocyanide, furnaces and retorts for, 343^a.
manuf. of, P 304^a, P 1692^a, P 1873^a, P 3716^a; 4032^a.
solns. of, P 804^a.
sulfide removal from, P 2536^a.
- Alkali metal fluoroborates**, refractive index of, 2217^a, 3816^a.
thermal dissocn. of, 3527^a.
- Alkali metal fluorides**. See *Alkali metal halides*.
- Alkali metal gold thiosulfates**, P 3429^a.
- Alkali metal halides**. (See also *Halides*.)
coloration by Ra salts, 1411^a.
complex salts of PbI₂ and, 1602^a.
compds. with Cd, 1772^a.
crystals, apparent external asymmetry of, 1211^a.
crystals, colloidal Au in, 3513^a.
crystals, joining with mica, 1211^a.
decompu. tensions of fused, 2887^a.
detn. of, 3848^a.
dispersion and mol. refraction of, 532^a.
halide ions in solns. of, refractivity of, 3539^a.
mol. vol. study of, 2211^a, 3496^a.
phosphorescent, 2427^a.
reaction with 1,2-epoxycyclohexane, 2608^a.
spectrum of, 1220^a, 3023^a.
surface energy of, 3005^a.
surface tension of, 517^a.
surface tension of, relation to soly. and chem. constitution, 2207^a.
synthesis of, energy of formation, contraction and polymerization in, 850^a.
ultra-violet absorption by crystals of, 3827^a.
- Alkali metal hydrides**, density of, 3153^a.
lattice energy of, 1222^a.
synthesis of, energy of formation, contraction and polymerization in, 850^a.
- Alkali metal hydrosulfides**, P 2964^a.
- Alkali metal hydroxides**. See *Alkalies*.
- Alkali metal hypochlorites**, P 992^a.
- Alkali metal hyposulfites**, from alkali hydrogen sulfites, P 629^a.
- Alkali metal iodides**. (See also *Alkali metal halides*.)
manuf. of, P 992^a.
photochemistry of, 2102^a.
- Alkali metal ions**, dissoln. in water, free energy changes accompanying, 1916^a.
- Alkali metal manganates**, from alloys, P 2764^a.
- Alkali metal nitrates**, conversion of alkali chlorides into, with production of Cl, 3712^a.
manuf. of, P 159^a.
- Alkali metal oxides**, from metal and O, P 2536^a.
positive ionization from Fe_2O_3 fused with, 856^a.
synthesis of, energy of formation, contraction and polymerization in, 850^a.
- Alkali metal perchlorates**, isodimorphism of alk. earth sulfates and, 3501^a.
- Alkali metal peroxides**, synthesis of, energy of formation, contraction and polymerization in, 850^a.
- Alkali metal plumbites**, oxidation to plumbate by a. c., 2616^a.
- Alkali metals**. (See also *Sodium*; etc.)
atoms, quantum mechanics of, 2096^a.
atoms, structure of, valency and, 3540^a.
in beryl, 878^a.
in blood, effect of air pressure on, 126^a.
cleavage of C-C bond by, 3904^a.
cryst. and amorphous states in, 1730^a.
crystal structure of, 2406^a.
detn. in silica brick, 4038^a.
effect on cathode drop of Hg, 531^a.
gaseous ions of, heat of combination with gaseous halide ions, 2604^a.
ionic radii of, 2842^a.
ions of, at. vol. of, relation to exchange in ions, 3795^a.
magnetic moments of atoms of, 206^a.
sepn. of Al or Zn from, 2444^a.
sepn. of Sb from, 2857^a.
sepn. of Mg from, 717^a.
sixth, attempts to discover, 1035^a.
spectrum of, 1059^a, 1063^a; 7.
theorem of sum for, 1907^a.
vapor pressure of, 2084^a.
- Alkali metal salts**, color changes in, 1411^a, 2432^a.
decompu. of diacetone alc. in solns. of alkali hydroxide and, 688^a.

- effect on C:N ratio of urine, 763³, 1480¹.
flames contg., elec. cond. of, 1058³.
liquid NH₃ solns. of, action on Mg and other elements, 689⁴.
mutual soly. effect of, having common ion, 329⁶.
soly. of, 847⁴.
synthesis of, energy of formation, contraction and polymerization in, 850³.
viscosity of fused, 348⁷.
- Alkali metal silicates.** (See also *Silicates.*)
manuf. of, P 629⁷, 4031¹.
- Alkali metal stannates**, manuf. of, P 304³, P 1526¹.
- Alkali metal sulfates**, dielec. consts. of, 696⁴.
manuf. of, P 992³, P 994³, P 2964¹.
- Alkali metal sulfides**, synthesis of, energy of formation, contraction and polymerization in, 850⁷.
- Alkali metal sulfates**, manuf. of, P 3429³.
reaction with halogen compds., 2673⁴.
- Alkali metal xanthates**, manuf. of, P 304³.
- Alkalimetry.** See *Alkalies*; *Alkalinity*; *Standard solutions*.
- Alkaline earth alloys**, amalgam, prepn. of, electrolytically, 3563⁷.
- Alkaline earth aluminates**, P 2173⁵.
sol., 2088³.
- Alkaline earth carbonates**, colloidal, 352¹, 2586⁹.
- Alkaline earth chlorides.** (See also *Alkaline earth halides.*)
mixts. with alkali metal chlorides, min. toxicity to plants, 2491⁶.
spectra (Röntgen) of, chem. constitution and, 1929⁴.
- Alkaline earth compounds.** (See *Calcium compounds*, etc., as well as definite alkaline earth compounds, as *Barium chloride*.)

 fusion of non-ferrous, 2246³.
 gas-contg., elec. behavior of, 3151⁴.
 for hairsprings, 1623⁴.
 Hall effect in, temp. and, 2215⁹.
 hardening of, theory of, 1432⁷.
 hardness of, 2654⁴.
 hardness of, relationships between Rockwell and Brinell nos., 1951⁹.
 heat- and acid-resistant, 1440¹.
 heat-resisting, failure in, 3882¹.
 heat treatment of, 885³.
 Heusler, crystal structure of, 3776¹.
 Heusler, magnetic properties of, 3337⁹.
 high-temp. resistant, 47⁹.
 internal friction of fused, 558³, 2581¹⁵.
 inverse segregation in, 1618³.
 limiting states of, 560¹, 1793³.
 liquation in molten, 217⁹.
 low-C, P 3885⁹.
 Ludwig-Soret phenomenon in, 560⁹.
 magnetic susceptibility of binary, 3811⁴.
 manuf. of, P 221⁷, P 1442³, P 2455⁴.
 mech. properties of, temp. and, 2246⁴.
 melting, P 49⁷.
 metallographic testing of non-ferrous, methods of A. S. T. M. for, 1158⁴.
 metallurgy and analysis of, 2655⁴.
 micrographs of, prepn. of, rule of A. S. T. M. for, 1158⁷.
 micro-hardness of, testing, 1431⁴.
 non-ferrous, for engines, 3593⁷.
 occlusion of gases by, in liquid and solid states, 553⁹.
 orange juice effect on, 3881⁹.
 from ores, P 49⁹.
 photoelec. expts. with liquid, 3154⁴.
 porosity in non-ferrous, 2655⁴.
 properties of liquid, and their relation to crystn. of the metal when cast and to solid castings, 3870⁶.
 protecting oxide covering on, formation of, 727⁹.
 for railway equipment, specifications of A. S. T. M. for, 1157⁹.
 research on, in relation to other scientific research, 46⁴.
 sepg. constituents of, P 3596⁹.
 specifications of A. S. T. M. for non-ferrous, 1433².
 spectra of binary, 3553⁴.
 for springs, P 2869⁴.
 static durability of, 1088¹.
 strengthening during drawing and compression, 1433².
 strength of, tests of, 3332⁹.
 structure of, effect of speed of cooling on, 3337¹.
 structure of non-magnetic, magnetic analysis as means of studying, 1617⁷.
 for submarine cable sheathing, P 222³.
 surface tension of molten, 3292³, 3589⁹.
 tempering of, 3035⁵.
 ternary, correlation of phys. and chem. properties in, 1955².
 thermal cond. and cond.-ratio of, constitution and, 2092⁴.
 thermal cond. of, effect of temp. and cryst. structure on, 1584⁷.
 thermoelec. e. m. f. of, 1052³.
 thermoelec. properties of, 2595⁹.
 for thermoelements, 2079².
 for tools, P 1443⁴.
 transformation phenomena in easily fusible, 1620⁴.
Allyl alcohol, chaulmoograte, 572¹.
 dehydrogenation and rearrangement of, 731⁴.
 effect on body temp., 1678⁹.
 elec. cond. of AgNO₃ in, 202¹.
 esters, oxidation to α -monoglycerides, 1096².
 rearrangement of, 731⁴.
Allylamine, β -bromo-*N*-methyl-, and salts, 53⁹.
 —, β (and γ)-chloro-*N*-methyl-, and salts, 53^{4, 9}.
 —, *N*-diphenylmethylene-, 3901⁴.
Allyl bromide, γ -chloro-. See *Propene*, 3-bromo-1-chloro-.
Allylene. See *Propene*.
sym-**Allylene**. See *Allene*.
Allyl group, migration of, in allyl phenyl ethers, 71⁷.
Allyl isothiocyanate. See "allyl ester" under *Isothiocyanic acid*.
Allyl mustard oil. See "allyl ester" under *Isothiocyanic acid*.
Almonds, bitter, detection of, 1869⁴.
 condiments contg., 2341⁴.
 emulsion of, biochem. synthesis of α -ethyl-l-arabinose with, 114⁴.
 emulsion of, examn. of, 2531¹.
 therapeutic effect of, 2920⁷.
Alnivridol, in bark, 599⁹.
Alnus. See *Alder*.
Alpac alloys. See *Aluminum alloys* or *Silicon alloys*.
Alpha particles, **Alpha rays**. See α -*Rays*.
Alphol, thread formation and surface tension of, 3291⁷.
Alpinism. See "at high altitudes" under *Atmosphere*.
Althea, sirup of, keeping qualities of, 2167⁴.
Altitude. See *Atmosphere*.
Alucol, effect on H-ion concn. of HCl, NaOH and pepsin, 2279¹.
Aludur, for elec. conductors, 1090⁷.
 germanium in, 3879⁹.
Alum. See *Alums*.
Alumina, adsorbed substances on, as catalysts, 2586⁴.

- adsorption of sulfate ion and oxalate ion by, effect of H-ion concn. on, 3785^a.
in aluminum and its light alloys, 2652^a.
from bauxite or clay, P 2362^a.
calcination of, 2837^a.
cast refractory articles contg., P 808^a.
as catalyst in CO decompn., 3530^a.
for dehydration of cyclic alcs., 570^a, 571^a.
for Et₂O manuf., 386^a.
in CH₃O decompn., 3530^a.
in formic acid decompn., 3530^a.
for hydrogenation of phenols, 2466^a.
for hydrolysis of salts of aromatic sulfonic acids, 69^a.
for prepn. of aromatic amines, 903^a.
for rearrangements of cyclic compds., 570^a, 1249^a, 3181^a.
for rearrangement of 3-methyl-1-butene, 3887^a.
coagulant contg., P 3995^a.
colloidal, coagulation of, 2831^a.
concn. and, 8^a.
with small pores, P 2965^a.
as softener for water, 2831^a.
in soils, soil moisture for plants and, 2753^a.
viscosity of, effect of H-ion concn. on, 10^a.
colloid ions of, rate of migration in elec. field, detn. of, 2588^a.
colloid prepn. from silicic acid hydrosol and ignited, 3006^a.
crystal structure of β -form, 1210^a.
crystals, x-ray diffraction of, 2971^a.
detn., 872^a.
detn. in Al salts, 718^a.
in bauxite, 719^a.
in chrome refractories, 4038^a.
in fluorspar, 720^a.
in glasses and minerals, 3327^a.
in lime, 1530^a.
in silicates, 2967^a.
extn. of, P 804^a, 3106^a.
fused, thermal cond. of, 635^a.
fusibility of mixts. with CaO, SiO₂, TiO₂ and TiO₃, 2452^a.
fusion with cryolite, anode effect in, 1934^a.
gels contg. Ra, emanating power of, 2586^a.
heat of reaction with hydroxides, 4002^a.
hydrated, P 994^a.
hydrated, of bauxites, 3031^a.
hydrogels, chemistry of, 1069^a.
manuf. of, P 2115^a, P 2362^a, P 3717^a, P 4035^a.
powder pellets of, hardness of, 3321^a.
purification of, P 630^a.
reaction with SrO, 3321^a.
recrystn. of pptd. and of fused, and of mixts. with Na₂CO₃ and with CaF₂, effect of water on, 4041^a.
reduction by W, 3842^a.
-silica, refractoriness of, compn. and, 2055^a.
from silicates, 803^a.
in soil, dynamics of, 4004^a.
soly. of, 2412^a.
spectrum of, 3159^a.
spectrum of, quantum analysis of, 1226^a.
suspensions of, coagulation of, 2832^a.
system: CaO-SiO₂, 20^a, 2229^a.
system: CaO-SiO₂, optical behavior in ultra-violet light, 3213^a.
system: MnO-SiO₂, 2244^a.
systems: MgO-SiO₂, and CaO-SiO₂, 1241^a.
vapor pressure at high temps., 681^a.
Aluminates, manuf. of, P 2362^a.
Aluminic acid. See *Aluminum hydroxide*.
Alumino. See "ammonium salt" under *Aurintricarboxylic acid*.
Aluminosilicates, chloride from, P 2362^a.
reactions with inorg. oxides, 3321^a.
Aluminothemic process. See *Thermite process*.
Aluminous materials, fused, soln. of, 2968^a.
Aluminum, absorption of H-rays by, 2601^a.
absorption of x-rays by, 3150^a.
as acid-proof material, 726^a.
acoustic diaphragms of, P 3719^a.
action of β - and γ -rays from radio Th on, heat liberation in, 856^a.
alumina in, 2652^a.
anode films of, electrostatic capacity of, 1580^a.
anodic oxidation of, films produced by, 3537^a.
app. of, 3492^a.
for brewing, 1517^a.
in inorg. chemistry, 1569^a.
for org. chemistry, 1033^a.
for sugar industry, 832^a.
atomic core, polarizability of, 699^a.
atomic decompn. by α -rays of Po, 3152^a.
atomic fragments of, detn. of masses of, 1055^a, 2219^a.
atomic nucleus of, polarizability of, 2423^a.
atomic structure of, 1749^a.
atoms, scattering of x-rays by, 2218^a.
in blood, 2908^a.
books: and Its Alloys, 561^a; Al Bronze Powder and Al Paint, 3692^a.
in brewing industry, 3419^a.
cadmium effect on, 218^a.
for cans, 3093^a.
casting, P 2869^a.
as catalyst in formic acid decompn., 3530^a.
as catalyst in MeOH decompn., 3530^a.
cathode polarization of, surface films in, 1766^a.
cathodes, disintegration of, 1928^a.
cell, current-time relations in, 3565^a.
cementation after double electroplating, 2651^a.
cementation by Cu, 1246^a.
centenary of, 840^a.
cerium effect on, 3036^a.
cleaning compn. for, P 3110^a.
coating, P 221^a, P 3597^a.
with other metals, P 888^a.
with silicates, P 1442^a.
with Zn, P 2118^a.
coating iron alloys with, P 3041^a.
coating Fe and steel plates with, P 220^a.
coatings for, P 222^a, P 657^a, P 862^a, 2867^a.
coating to prevent corrosion and for ornamentation, P 3180^a.
coating with, P 3343^a.
for corrosion prevention, P 888^a.
by spraying, 1960^a.
com. forms and uses of, 3880^a.
com. manipulation of, 3881^a.
Compton lines of, ratio of intensity of, 2605^a.
as construction material in chem. industries, 1569^a.
contact e.m.f. with Cu, temp. coeff. of, 2417^a.

- silicon-, and their ternary alloys with Na, Cu, Zn and Mg, 1083¹.
- silver-, tarnish resistance and phys. properties of, 1956¹.
- silver-, useful, 1000¹.
- smelting, 2637¹.
- solder for, P 1247¹, P 3180¹.
- specifications of A. S. T. M. for, 1157¹.
- spectral analysis of, 1439¹.
- static durability of, 1088¹.
- thermal emission of, 701¹.
- tin-, and Zn-, corrosion and phys. properties of, 2454¹.
- tin-, magnetic susceptibility of, 3811¹.
- tin-Zn-, 47¹, P 50¹.
- tin-Zn-, for printing-surfaces, P 3041¹.
- undercooling of, 3880¹.
- welding, 3179¹.
- welding and after treatment of, 3179¹.
- zinc-, for accumulator grids, etc., P 729¹
- tensile tests on crystals of, 3338¹.
- transformation in solid condition, 1619¹.
- Aluminum bromide**, elec. cond. of, in nitrobenzene, 3298¹.
- electrochem. behavior of, 201¹.
- ionic mobilities of solns. in molten, 687¹.
- potential of Al electrode in, in pyridine, 1051¹.
- reaction with BrCN , 3170¹.
- sol. in pyridine, 1051¹.
- as starter for Grignard reaction, 2600¹.
- Aluminum carbide**, reaction with N and S in KCNS , 366¹.
- Aluminum chloride**. (See also *Friedel-Crafts reaction*; *Hydrocarbon oils*; *Petroleum refining*.)
- as catalyst for benzoyl peroxide reactions, 1454^{1,2}.
- as catalyst for hydrogenation of org. compds., 2470¹.
- as catalyst for manuf. of amines and nitriles, P 1272¹.
- as catalyst for prepn. of bornyl esters, P 1272¹.
- condensing, P 3428¹.
- effect on protoplasm of *Ameba proteus*, 1130¹.
- hydrolysis of alkoxy groups in alkaloids with, 1988¹.
- manuf. of, P 160¹, P 630¹, P 993¹, P 1160¹, P 1336¹, P 2763¹, P 3428^{1,2,3}.
- purifying, P 4034¹.
- reaction with tolyl benzoates, 1642¹.
- solidifying, P 4034¹.
- as starter for Grignard reaction, 2600¹.
- system: $\text{HCl} \cdot \text{H}_2\text{O}$, 2414¹.
- system: $\text{KCl} \cdot \text{H}_2\text{O}$, 2229¹.
- volatilization of, 2239¹.
- Aluminum compounds**, of acetylacetones, crystal structure and isomorphism of, 841¹.
- with cupferron, soly. of, 3791¹.
- 5,5 dimethyl - 1,3 - cyclohexanedione complex salts, 394¹.
- with nitrosyl chloride, 3573¹.
- optically active, 1416¹.
- from ores, P 4034¹.
- spectrum of AlH , 3023¹.
- Aluminum ethoxide**, effect on condensation of aldehydes to esters, 387¹.
- manuf. of, P 249¹.
- Aluminum β -ethoxy-ethoxide**, as catalyst for ester manuf., P 1660¹.
- Aluminum hydroxide**. (See also *Water, purification of*.)
- adsorption by, 2584¹.
- adsorption of papain on, 1464¹.
- adsorption of pepsin by, 921¹.
- as catalyst for condensation of acetone, 1962¹.
- colloidal, chemistry of, 1069¹.
- effect on H-ion concn. of HCl , NaOH and pepsin, 2279¹.
- streaming double refraction and thixotropy of, 3295¹.
- thixotropy of, 1391¹.
- viscosity of hydrophobic, and its change on addn. of electrolytes, 3515¹.
- "freezing up" of alkali soils during reclamation and, 787¹.
- manganous hydroxide entrainment by, 2446¹.
- manuf. of, P 304¹, P 1168¹.
- manuf. of, from alunite ore, P 3107¹.
- for opal glasses, 2768¹.
- precipitates of, freeing from adsorbed acids, 2586¹.
- precipitation by NH_3 , 872¹.
- scaly variety of, 3170¹.
- vapor pressure of, 722¹.
- Aluminum ion**, effect on tadpoles, 2280¹.
- Aluminum lithium chloride**, 3572¹.
- Aluminum magnesium chloride**, 3572¹.
- Aluminum methoxide**, as catalyst for AcOH manuf., P 3368¹.
- Aluminum nitrate**, hydrates of, 3842¹.
- manuf. of, P 479¹.
- system: $\text{Fe}(\text{NO}_3)_3 \cdot \text{H}_2\text{O}$, 3150¹.
- system: $\text{KNO}_3 \cdot \text{H}_2\text{O}$, 2108¹.
- Aluminum nitride**, 3800¹.
- nitrogen fixation as, 803¹.
- Aluminum ore**. (See also *Bauxite*.)
- deposits, 2244¹.
- sepn. by flotation, P 2455¹.

- Aluminum oxide.** See *Alumina*.
- Aluminum perchlorate**, hydrates, 3841^a.
- Aluminum phosphate**, soly. in water, 3100^a.
- Aluminum potassium sulfate.** (See also *Alums*.)
synthesis of, energy of formation, contraction and polymerization in, 851^a.
- Aluminum salts**, effect on plants, 758^a.
effect on sugar cane, 2352^a.
manuf. of, P 478^a.
org., use in chem. industries, 989^a.
production and distribution of, 302^a.
for tanning, P 3485^a.
tuberculosis treatment with, 963^a.
- Aluminum silicates.** (See also *Fuller's earth*.)
 $Al_2(SiO_3)_2$, as antacid, 2004^a.
chem. and mineralogical studies of, 877^a.
crystal structure of, 3145^a.
effect on bile duct contractibility, 3083^a.
- Aluminum sulfate.** (See also *Alums*.)
as catalyst for rearrangement of 3-methyl-1-butene, 3887^a.
dehydration of, 3321^a.
manuf. of, P 160^a, P 3108^a.
soly. of solns. of, and of their mixts. with K_2SO_4 , 3792^a.
- Alums.** (See also *Aluminum sulfate*; *Water*, *purification of*.)
ammonium, Fe removal from, P 1335^a.
ammonium vanadium, 712^a.
as catalysts for manuf. of Et_2O from $EtOH$, 386^a.
chrome, P 3429^a.
chrome, light absorption by, temp. and, 2225^a.
chrome, sp. gr. of green solus. of, 3848^a.
crystn. of, 347^a.
crystals grown in presence of gelatin and dyes, 3780^a.
crystals, growth between glass and between mica surfaces, 1731^a.
crystals, magnetic quality in, 2418^a.
deproteinization with, 928^a.
effect on neoplastic tissue, 2034^a.
iron sulfate removal from, P 994^a.
from leucite of Italy, 1167^a.
mining and production of, 1078^a.
photoelec. effect in, effect of water of hydration on, 2095^a.
poisoning from mixts. of $ZnSO_4$, $CuSO_4$ and, 3967^a.
potassium, rhythmic crystn. of, 2407^a.
production and distribution of, 302^a.
synthesis of, energy of formation, contraction and polymerization in, 851^a.
vanadium, 711^a.
viscosity of solns. of, 3792^a.
- Alundum**, thermal cond., diffusibility, heat capacity and sp. heat at high temps., effect of porosity on, 1585^a.
thermal expansion in, effect of porosity on, 1585^a.
- Alunite**, aluminates from, P 2173^a.
aluminum hydroxide from, P 3107^a.
cement from, P 638^a.
change from oligoclase through, to hydrargillite, 1782^a.
dehydration of, 1610^a.
- Alvite**, hafnium content of, 3830^a.
rhenium content of, 1570^a.
- Allypina**, anesthetic action of, effect of K on, 3880^a.
detection of, 1867^a.
- Amalgamation**, dental, app. for, P 307^a.
- Amalgamators**, for gold ores, P 2455^a.
for ores, P 2115^a.
- Amalgams**, alkali and alk.-earth, prepn. of, electrolytically, 3563^a.
aluminum-, electrode potentials of, 2417^a.
reaction with amino acids, 389^a.
as reducing agent for reduction of aromatic sulfonyl chlorides, 1974^a.
cesium, 891^a.
dental fillings of, poisoning from Hg vapor from, 137^a, 138^a.
dental, poisoning by, 1320^a.
elec. properties of, 3037^a.
electrochem. behavior of Ag and Cu, 3809^a.
electrodes for detg. activities in methanol, 3809^a.
lead-, P 2456^a.
liquid, in quant. analysis, 2858^a.
liquid, in volumetric analysis, 1604^a, 3574^a.
magnesium, reducing action of, 3901^a, 3902^a.
metallography of, 559^a.
platinum-, colloidal, 3512^a.
poisoning by, 962^a, 3962^a.
potentials of, 2416^a.
printing surfaces contg., P 161^a.
rubidium, 891^a.
of sodium and Ga, prepn., properties and mineralogical uses of, 1781^a.
sodium, reduction of nitro compds. with, 376^a.
sodium, reduction of $RuCl_3$ with, 1418^a.
zinc-, heat of mixing in formation of, 3013^a.
- Amanita**, *muscaria*, effect of juice on muscle, 2332^a.
verna, poisoning with, 962^a.
- Amatol**, removal from shells, 325^a.
- Amazon stone**, thermal expansion of, 2581^a.
- Amard's law.** See *Laws*.
- Amber**, of Kuji, 1749^a.
testing of pressed, with Röntgen rays, 3137^a.
- Amblygonite**, lithium content of Canadian, 369^a.
- Amblystoma**, embryos, effect of chloretone on, 966^a.
embryos, effect of KCN on, 2155^a.
larvae, metabolism in, 2508^a.
nervous system of, effect of hyoscine-HBr on, 1147^a.
- Amboceptors**, 608^a.
complement fixation by, 2931^a.
formation of, effect of neoarsphenamine on, 3981^a.
- Ambrac**, 48^a.
- Ambrettolic acid** (*o*-hydroxy- β -hexadecenoic acid) and lactone, 2118^a.
lactone, constitution of, 3707^a.
—, dihydro-. See *Juniperic acid*.
- Ambrettolide**^a, 2118^a.
constitution of, 3707^a.
—, dihydro-. 2119^a.
- Ambrohn Festschrift**, book, 3306^a.
- Ambrosia artemisiifolia.** See *Ragweed*.
- Ameba**, adaptation to saline solns., 2741^a.
dubia, protoplasm of, effect of CO_2 and salts of Na, Ca and K on, 2941^a.
ethylene glycol effect on, 1150^a.
growth and multiplication of artificial, 2155^a.
imitation of, 3372^a.
imitation of, in motion, 1994^a.
intestinal, effect of yatrien on, 2935^a.
movements of, surface tension and, 1993^a.
proleus, protoplasm of, effect of chlorides of Pb, Hg, Cu, Fe and Al on, 1130^a.

- Amebocytes**, of marine invertebrates, elec. charge, agglutination and H-ion concn. in, 3982⁷.
 urase extraction from *Limulus*, sp. effect of salts in, 2337¹.
- Amelanchier botryapium**, hydrocyanic acid in, 1831².
- Amenorrhea**, basal metabolism in, 2731⁶.
- American Chemical Society**, presidential address of Geo. D. Rosengarten, 3288⁶.
- American Institute of Chemists**, medal award to Lafayette B. Mendel, 2404².
- American Pharmaceutical Association**, work, purposes and ideals of, 4027⁹.
- Amerimnon sissoo**. See *Sissoo*.
- Amethyst**, coloring of, 3329².
 colors in, colloids as, 3031¹.
- Amidation**, of cotton, 1015⁸.
- Amides**, acid, *N*-chloro-, similar behavior of, and persubstituted halogen compds., 52¹.
 acid, prepn. of aryl derivs., 1451⁴.
 reaction of Grignard reagents with α -trisubstituted primary, 3359⁴.
 sulfates of, P 2907⁶.
 amines from acid, 2669^{1,2,3}.
 of amino acids, cleavage of substituted, 1466⁷.
 of amino acids, formation of hydroxyacyl derivs. from haloacyl amino acids, 390⁷.
 detection of, 3328².
 detn. in sugar-house products, 3481⁵.
 manif. of, P 3907⁴.
 reaction with NaOCl, 2874⁴, 2875¹.
 thio-, 98¹.
- Amidines**, of holocaine type, 236².
 tautomerism of, 97⁴.
- Amidogens**. See *Amino groups*.
- Amidopyrine**. See *Pyrimidone*.
- Amines**. (\bullet Individual amines are named in the usual way as Ethylamine, Diethylamine, Triethylamine, Benzylamine, etc., and as derivatives of these. Aliphatic amines are numbered with Greek letters commencing next to the amino group (*primary* and *seconds* being used where necessary with secondary and tertiary amines). Mixed amines are treated as derivatives of the largest simple amine present.)
 absorption of infra-red light by, 2659².
 absorption of ultra-violet light by, 1931².
 addn. compds. of aromatic, with 1,4-di-methyl-2,5-piperazinedione, 1797¹.
 ammonium character of di- and triaryl, 1800⁴.
 ammonium character of tertiary aromatic, 395².
 antioxygenic properties of, 1584¹.
 aromatic di-, reaction with activated Mg, 3170⁴.
 calorific value of, 3452⁷.
N-chloro-, aromatic, importance in arts, 2510⁸.
 chloro-, in disinfection of hair and bristles, 2488².
 by destructive distn. of waste cellulose liquor or other org. materials, P 321⁸.
 detection of, 3328².
 detn. of primary aromatic, 37⁷.
 diazotization and nitration of aromatic, 2256², 3356².
 di-, condensation of aromatic, with dicarboxylic acid anhydrides, 2801⁷.
 pharmacology of aliphatic, 565².
 reaction of aromatic, with PhNO₂, 1809⁴.
 disinfectants contg., P 476².
 in distillate from Kjeldahl-Gunning N detns., 30⁸.
 distinguishing primary, secondary and tertiary, 1970².
 effect on nerves, 3968⁷.
 elec. charge reversal by H ions and by OH ions in, 1910¹.
 halogenated tertiary, 3355⁵.
 hydroxy—see *Alcohols*, amino-; *Phenols*, amino-.
 identification of, 99⁴, 405¹.
 manif. of, P 2273⁴, P 2274⁴, P 2703⁴.
 manif. of, and derivs., P 1272⁴.
 manif. of aryl, P 249⁴.
 manif. of primary, P 3626⁴.
 methylsulfites of secondary, P 592².
 naphtholsulfonates of aromatic, 1040⁸.
 oxidation of primary, 2671², 3052¹.
 prepn. of, 895⁴.
 prepn. of aromatic, 903⁸.
 prepn. of, from aromatic nitro compds., 1799⁷.
 reaction of aromatic, with alkylene bromides, 903⁸.
 with sulfamic acid, 738⁹.
 with SnCl₂, P 2478⁶.
 with thiosemicarbazide and its derivs., 2901³, 3894⁸.
 reaction with β -nitrostyrene, 2253⁸.
 with org. α -oxides, role of H₂O in, 2248².
 with quaternary NH₄ halides, 409¹.
 with wood, 3384².
 salts of CH₃CHCO₂H and of CH₃CCO₂H, 1630².
 spectrum of, 2845⁷.
 sulfonation of aromatic, P 3058².
 surface e.m.f. of, 2418¹.
 synthesis of, 2668⁹.
 synthesis of, modification of the Gabriel, 78⁸.
 toxicity to *Aphis rumicis*, 4008⁹.
- Amino acid anhydrides**. (See also "derivs." under 2,5-Piperazinedione), 2911².
 imidazolone derivs. as, 1813².
 unsatd., 1965⁸, 1966^{4,6}, 2877⁴.
- Amino acids**, absorption by red blood cells in relation to distribution of residual N, 449².
 in "acetone bodies" production and decompn., 1468⁴.
 acylation of, in presence of pyridine and acetone, 3000².
 addn. compds., 897².
 adsorbates, prepn. of, 380⁴.
 amides, cleavage of substituted, 1466⁷.
 amides, formation of hydroxyacyl derivs. from haloacyl amino acids, 390².
 as amorphous impurities in gelatin, 3019⁸.
 of blood in pregnancy, 3942².
 in blood of angiotomized dogs, reaction of organs to N of, 1142⁸.
N-carboxy-, anhydrides of, 377⁸, 389⁹, 3355¹.
 catalysis by mixts. of salts, peptone and, 256⁸.
 catalytic and sp. dynamic actions of certain, 1440⁸, 1631⁸.
 combustibility of, 950².
 compds. with Cr, 1600².
 with dyes, 68⁹.
 with 2,5-piperazinedione derivs., 1797¹, 1966⁸.
 with piperazines, 383⁹.
 constitution of, 1656².

- copper salts, 1965².
 copper salts, optical rotation of, 1656².
 in cryst. lens in dynamic refractions, 3083⁷.
 degradation by hypobromite, 3892³.
 degradation products of, oxidoreduction system and, 1820².
 dehydrogenation of, org. catalysts for, 2126².
 derivs., dehydrogenation of, 1966², 2877⁴.
 destruction through radiation, 2434³.
 detn. of, 3378².
 in digestion products of proteins, 2712⁷.
 in foods, 2742².
 in wheat and flour, 1155².
 detn. of primary aliphatic, app. for, 1285².
 di, pptn. of, 3640².
 double ion detn. in, 2412².
 effect on NH₄ formation in tissues, 423⁷.
 on blood pressure, 2933².
 on division rate in *Paramecium caudatum*, 1314².
 on fermentation by yeast, 925⁷.
 on germination of *Phyomyces nitens*, 942².
 on hydrolysis by pancreatic lipase, 2706².
 on sepn. and detn. of 2,5-diacylperazines, 1609¹.
 on sugar metabolism, 3393².
 on tetanus toxin, 2504¹.
 on urease activity, 224².
 in eggs, changes during incubation, 2309².
 in embryonic juice, effect on multiplication of fibroblasts, 2299².
 in embryos of chickens, 123¹.
 excretion of, 1141⁷.
 effect of pentoses on, 1311⁷.
 in urine, 1140².
 in fat digestion in intestine, 2309².
 in foods, effect on urinary C:N quotient, 3655².
 formation in molds, 598².
 of fraction I of BuOH extn., effect on sp. dynamic action of protein, 2724².
 gonococcus cultivation and, 3381⁴.
 Grignard reagent and, 721⁴.
 of herring meal, 430².
 hydrolytic properties of, 3373⁴.
 light absorption by, in ultra-violet, 2848².
 manif. of, P 2477⁷.
 metabolism of, in placenta, 3075².
 metabolism of, liver in, 270⁷.
 in milk, 284².
 in nutrition, 119².
 optically active inner complex salts of, 897⁷.
 optical rotation of, 1965².
 oxidation capacity of, use in analysis, 597².
 oxidation of, effect of Wiesbaden hot spring water on, 2280².
 in pear, site of formation of, 3386¹.
 permeability of membranes to, effect of H-ion concn. on, 263².
 pharmacol. action of, 1847².
 phys. properties of, 383².
 prepn. of, 57².
 prepn. of α -, 1097¹.
 prepn. of β -, 1257², 1978².
 in protamine of sardine, 462².
 in protein of eggs, changes during development, 2337².
 in proteins, proportions of, 2275².
 reaction with Grignard reagents, 567², 568¹.
 with hexoses and hexosephosphoric acid ester, 2270².
 with pyruvaldehyde, 3622².
 with quinones, 1451².
 with sugars, 373², 426², 737¹, 2462².
 rearrangement of α -, into unsatd. compds. and their transformation into α -keto acids, 1906².
 in sericin, 2281².
 of soy-bean meal, 430².
 spectra of, 567².
 in sugar products, 4086².
 synthesis in animal body, 438².
 synthesis of, 2876², 2882².
 taste of α -, constitution and, 918².
 of testicle of *Bos taurus*, 2303².
 in testicles, 3222⁷.
 thio derivs., 98².
 of tortoise shell, 107⁷.
 uric acid groupings of, O:N ratio in proteins and, 3200¹.
 Wassermann reaction and, 2152².
Amino alcohols. See *Alcohols*.
Amino compounds. in eggs of silkworm, 3684².
 manif. of, P 3370¹.
 nitration and diazotization of, 2256².
 nitration of, P 3369².
 reaction with carbohydrates, 1969².
 stabilities of, 678¹.
 of sugars, 3629².
Amino group. (See also *Deamination*.)
 detn. in nitroarylamines, 3858².
 effect of substitution on reactivity of, 1637².
 elimination from tertiary amino alcs., 1977².
Amino oxides. See *Oxides*.
Aminosulfonic acid. See *Sulfamic acid*.
Ammine compounds, bismuth-, 1768².
 of borohydrofluoric acid, 1235⁴.
 boron-, 541².
 chromium- and Co-, mol. vols. of, 1601².
 chromium-, color changes in, 1587².
 chromium-, reaction with PhMgBr, 3572².
 cobalt-, 2082¹, 2442⁴.
 activity coeffs. of, 1046².
 crystal structure of, 1384¹, 3500².
 ionic reactions of, velocity of, 1046².
 mol. vols. of, 677².
 phosphoric acid as binder in, 366⁷.
 photochemistry of, 1063².
 spectral transmission curves of aq. solns. contg., 1773².
 spectrum (Röntgen) of, chem. constitution and, 1920⁴.
 synthesis of, energy of formation, contraction and polymerization in, 851².
 cobalt- and Cu-, adsorption on charcoal, 683¹.
 cobaltiboro-, 1420².
 copper-, 868¹, 2443².
 copper-, as donors, 1184⁴.
 crystal structure of Cr-, Co- and Fe-, 3777².
 gold-, 3496¹.
 iridium-, 2622².
 iron-, activity coeffs. of, 1046¹.
 iron cyanide-, 1769⁴.
 iron-, spectrum of, 3021⁴.
 with lanthanum chloride, CeCl₃, PrCl₃ and NdCl₃, spectra of, 1215².
 magnesium-, 689².
 mol. vol. of NH₃ in, of cuprous, Ag and aurous halides, 1037².
 palladium-, isomerism of, 3843².
 platinum-, 2620², 2622⁴, 3846².
 platinum-, mol. magnitude of isomeric, 539⁷.
 ruthenium cyanide-, 3846².
 structure of, 3570².

structure of certain, of 1,2,3-propanetri-amine, 388⁹.

Ammonia. (See also *Ammino compounds*; *Ammonia manufacture*; *Ammonification*; *Ammonium hydroxide*; *Ammonium nitrate*; *Ammonium sulfate*; *Nitrification*.)

absorption in acid soln., app. for, P 3144⁷.
absorption of mixts. of $\text{Cu}(\text{NO}_3)_2$ and, in NH_4NO_3 , 1397⁹.

absorptive power of cellulose for, 1707¹.

adsorption of, on activated and non-activated C, 1734⁶.

on charcoal, heat of, 3814³.

by $\text{Fe}(\text{OH})_3$ gel of pure, and in mixts. with air, 2585⁹.

alc., solidifying, P 3434².

anisotropic mols. of, refractivity of, 1402⁸.

autolytic formation in tissues, 423⁷, 3665⁹.

autolytic production of, nuclein metabolism and, 1837⁶.

in blood, 443⁹, 1999⁹, 2312².

in blood in disease, 769⁹.

of blood, origin and distribution in angiotomized animals, 1142⁶.

boiling p. of, cohesive forces and, 1727¹.

catalytic oxidation with active C of H_2S mixed with, P 466².

chem. const. for, 693¹, 3504⁸.

compressibility of, mass of normal liter and, 1382².

conversion of, kidney function in, 2726³.

in corrosion prevention in petroleum refining, 1544⁴.

in cottonseed, 1196⁸.

in cottonseed meal, 3276⁹.

crit. const. of, 1036².

in culture media, parallelism between cond. and, 114².

cylinders, caps for, P 2173³.

decompn. of, with catalysts, 802⁸, 3531⁸.

by heat on surface of Mo wire, 1744⁹.

on iron catalysts, 2593⁸.

on Pt surfaces, heat of adsorption and, 522⁶.

sensitized by Hg vapor, effect of A, N and H on, 3024⁷.

density and vapor pressure of, 1045².

detection of, 1774².

detn., 28⁸, 30², 368².

detn. in blood, 443⁹.

in cottonseed, 1197².

in urine, 2003⁹.

dielec. const. of, pressure influence on, 1587².

diffusion into gelatin, Liesegang ring formation in, 1911⁸.

dispersion of ultra-violet light in, 1758⁹.

disocn. study on, at high temps., 3800⁸.

effect on amylolysis by diastase, 2321⁹.

on blood sugar, 122⁸.

on breeding of flies in feces of cattle, 2741².

on calfskin, 1564⁹.

on complement, 950⁹.

on corrosion in distg. petroleum, 2553⁷.

on lungs, 774².

on muscle of invertebrates, 1496⁸.

on peptic digestion, 1846⁸.

on uric acid, 1273⁹.

on wool, 653⁹.

in eggs (cold-storage), 3093⁴.

elec. cond. of acids and salts in liquid, 3522⁴.

elec. cond. of NH_4NO_3 and NH_4Cl in, 3531⁷.

elec. cond. of Na dissolved in, 2096².

electrolytic dissoln. tension toward, 3522⁹.
elimination in cultures of microorganisms, 3026².

equil. pressure of, mixed with N, 2213⁹.

excretion in urine, effect of salt and acid content of drinking water on, 2140⁴.

excretion of, effect of pentoses on, 1311⁷.

explosion of Hg vapor contg., 1012⁶.

formation of, in blood, carbohydrate metabolism and, 3949⁴.

in diabetes mellitus, 2502⁸.

from elements by silent discharge in Siemens tube, 1691⁴.

by hydrolysis of alkali cyanates, 2705¹.

by kidney, 2923⁹.

by kidney and brain tissues, 1825².

heat of adsorption of, pressure and, 1577².

heat of vaporization of, 692⁹.

hematin-, effect on vegetable-tanned leathers, 3484⁶.

from hydrolysis of CaSiN_2 , 28⁴.

interchange with urica, function of kidneys in, 3074⁶.

internal pressure and coeff. of expansion of, 348⁹.

ionic mobilities in mixts. of H and, 1222².

in lakes near Madison, Wis., 785⁴.

liniment, 2091¹.

liquid, as solvent for org. compds., 3047³.

liquid, solns. of salts of alkali and alk. earth metals, action on Mg and other elements, 689⁴.

lithium ions in, motion of, 2584⁵.

metabolism of, in extremities normally and in HCN poisoning, 2306².

mol. heat of, 3151¹.

mol. model of, 1752⁶.

mol. spectrum of, 3310⁹.

mol. vol. at abs. zero, 3496⁸.

mol. vol. of, in ammoniates of cuprous, Ag and aurous halides, 1037⁶.

in muscle, 2928⁶.

nitric acid manuf. by catalytic oxidation of, 3712⁷.

nitrogen of, value in fertilizers of nitrate N and, 148¹.

as nitrogen oxide source for chamber acid plants, 4029⁴.

orthobaric d. of, 3782¹.

outlets for, 3106⁴.

oxidation gas, adsorption of N oxides from, 626⁸.

oxidation of—see also *Nitric acid*; *Nitrogen oxides*

oxidation of, P 303⁸, P 992⁴, 2361⁸, P 4034⁴.

absorption of N oxides from, 1332⁹.

app. for, P 4034⁴.

catalysis of, 13¹, 802⁷, 1871⁸, 1872², 3531⁴, 4030².

to niter on alk. surfaces, 2760⁷.

partial pressure over $(\text{NH}_4)_2\text{SO}_4$, 1880⁹.

pharmacol. action of, effect of yakriton on, 1494⁶.

photochem. decompn. of, 3831⁷.

photochem. decompn. of, by excited Hg atoms, 858⁹, 859¹.

photoelectricity of Pt loaded with, 2427⁴.

photosynthesis with, 3648⁴.

poisoning of H electrode by, 3537².

precipitation of $\text{Al}(\text{OH})_3$ by, 872⁹.

production statistics, 466⁴.

reaction velocity with org. halides, 1581⁸.

reaction with AcOH , 202⁸.

with activated Mg, 3170⁶.

- with *o*-hydroxyphenyl diketones, 2471³.
with naphthols, CaCl₂ as catalyst for, 3803⁴.
with org. α -oxides, role of H₂O in, 2248⁶.
with propene oxide, 1904⁴.
as refrigerant, 3403⁹.
sepn. from gaseous mixts., P 304⁷.
sodium solns. in liquid, d. of, 3520⁵.
soly. in cyclohexanol, 1741⁶.
soly. in water of NH₄ salts of mono- and poly-
basic acids in presence of, 2412⁹.
soly. of non-radiated cholesterol in, 3915⁹.
spectrum of, 1759⁶, 2011⁶, 3831⁷.
steel treatment with, Krupp plant for, 47⁴.
synthesis, activation by electrons, 3548³.
catalyzers for, thermionic emission from
Fe-alkali mixts. used as, 2425⁷.
CO₂ removal in, 1332⁹.
equil. in, 2592¹.
system: Fe₂(SO₄)₃-, 1744¹.
system: HCl-, heat of neutralization of, 2835⁴.
system: K₂O-P₂O₅-H₂O-, 3303¹.
systems: formic acid-, butyric acid-, and
succinic acid-, 1579⁶.
systems: *o*- (and *p*)-nitrophenol-, 573⁹.
system: SO₂-H₂O-, 3730⁸.
systems with org. acids, 3188⁹.
titration with borax, 215⁹.
urinary acidity and, 1144⁹.
in urine, 2700⁹.
of urine in Parkinson's disease, 3677⁷.
in urine, sweat and blood, 2911¹.
vapor pressure of, over system: water-
NH₃-CO₂-NH₄NO₃, 1212⁹.
Ammonia, manufacture of. (See also *Am-
moniacal liquor*; *Ammonium sulfate*;
Coking; *Nitrogen fixation*.) P 478⁸.
from ammonium salts, P 4034².
from ammonium sulfate, 3731³.
from carbides, P 3716¹.
catalytic reactions for, P 1168⁸.
from cyanides, P 992⁴, P 3255⁴, 4032⁷.
by destructive distn. of waste cellulose liquor
or other org. materials, P 321⁴.
from lignite coke, 1880⁹.
from metal compds., P 304⁵.
from nitrogen and H₂O, P 1692⁷.
from peat, 3443⁹, P 4055².
recovery from distn. gases, P 2536⁸, 3712²,
3730⁹.
by Burkheiser process, 4049¹.
by gypsum, 2783⁹.
recovery from gas liquor, 167⁷, 2902⁷.
review, 3690⁹.
synthesis, 3289¹. (*Patents.*) 159⁶, 303⁷, 3⁸,

synthesis, app. for, P 804⁴, P 3107⁷.
from butyl fermentation gases, 3702⁷.
Carrara process for, 3712⁹.
catalysis of, 1744⁴.
catalysis of, app. for, P 1168⁸.
catalysts for, P 159⁶, 802⁴, P 992¹, P
1168⁸, P 1336⁹.
catalysts of Fe for, 802⁴.
catalysts of Fe for, effect of O on, 691⁹.
catalysts of Fe for, effect of O or H₂O on,
2593⁴.
deterioration of structural steels in, 3875⁹.
effect of CH₄ on, 4029⁹.
gas mixt. for, P 1526⁴.
N and H production for, P 4034².
purification of gases for, P 992¹, P
3427⁹.
purifying H for, P 1168⁸.
by silent discharge in Siemens tubes,
1691⁴.
in Spain, 2361⁴.
at works of Badische Anilin und Soda
Fabrik at Oppau, 4030².
tar acid recovery from NH₃ still effluent by
activated C, 4052⁹.
from thiocyanate liquors, 4032¹.
from vinasses, P 297⁴.
Ammoniacal derangement, 1825¹.
Ammoniacal liquors. (See also *Gas liquor.*)
evapn. and purification of, P 2749⁸.
phenol detn. in, 1945⁹, 2962⁷, 3119⁹.
phenols in, elimination and recovery of, 814⁷.
phenols in, recovery of, P 786⁴, 3732².
Ammoniates. See *Ammino compounds*.
Ammonification, in red prairie soils, 4004⁷.
soil acidity and, 2346⁹.
by soils of Bara, 2753⁷.
sulfur in, microbic oxidation of, 1475¹.
Ammonite, shells, mineralization of, 1950¹.
Ammonium acetate, effect of HgCl₂ or chloral
and, on fermentation, 3067².
in extg. exchangeable bases of soils, 2753⁹.
potentials in partition equil., 694⁹.
prepn. of, 1522⁴.
replacement of food protein by, effect on N
and fat deposition, 441⁹.
solus., prepn. of, 3709⁹.
Ammonium arsenotungstovanadate, 1233⁷.
Ammonium bromide. (See also *Ammonium
halides.*)
manuf. of, 1333⁷.
system: NH₄-, 2082⁹.
system: KBr-, 3776⁹.
Ammonium carbamate, heat of formation of,
3304⁴.
Ammonium carbonates, from ammonium
carbamate, P 3108⁹.
soly. of CuSO₄, malachite and Burgundy ppt.
in, 2210⁹.
NH₄HCO₃, as fertilizer for rice, 790².
manuf. of, P 304¹, P 3716⁴.
urea formation from, under influence of
charcoal and organ pulp or blood, 952¹.
(NH₄)₂CO₃, effect on urea bacteria, 113⁹.
manuf. of, P 3716⁴.
soly. in glycerol, 2356⁴.
as stabilizer for metaldehyde, P 2479⁸.
Ammonium chloride. (See also *Ammonium
halides.*)
adsorption of, 1388⁷.
alkalosis treatment with, 605¹, 3089⁹.
density of solns. of, 3790⁴.
as diuretic, 901⁴.
effect on anesthetic action of cocaine, stovaine
and novocaine, 1845⁷.
on breeding of flies in feces of cattle, 2741¹.
on calcification, 2493⁹.
on clay-time complex, 2523⁴.
elec. cond. of, in NH₃, 3536⁷.
elec. cond. of, in liquid H₂S solns., 847⁷.
in elec. field, behavior of, 2590⁹.
equil. with dissolved Ca and CaCO₃, effect
of adsorbents on, 3510⁴.
ethyl alc. solns. of, anodic behavior of Cd
in, 2417⁹.
flocculating power on clay, 2161¹.
glucemia from, in adrenalectomy, 777⁹.
heat of transformation of, 692⁹.
manuf. of, P 2964³, 3106⁹.

manuf. of, app. for, P 4035¹.
 mass-wt. ratio of, 1035¹.
 molten, 7313¹.
 pharmacol. action of, 183¹, 3978¹.
 poisoning, death rigidity and postmortem acid formation in, 2936¹.
 potential in partition equil., 694¹.
 spectrum (Röntgen) of, chem. constitution and, 1929¹.
 tetany prevention with, 2500¹.
 vapor pressure and vapor d. detn. of, app. for, 3506¹.

Ammonium chromate, system: K_2SO_4 - K_2CrO_4 -(NH_4) $_2$ SO_4 , 523¹.

Ammonium citrate, reaction with Ca phosphates, 148¹.

Ammonium cobalt sulfate, solid solns. with NH_4 Cu sulfate, soly. of, 3503¹.

Ammonium compounds. (See also *Ammonium compounds, substituted.*)
 complex oxalates, 3322¹.

Ammonium compounds, substituted.

(Many compounds that might be classed here are, for convenience, named as acetates, hydrochlorides, methiodides, etc., and entered under the corresponding bases.)

[γ -(4-acetamido - 3 - nitrophenyl)propyl]trimethyl— picrate, 2254¹.

[γ - (p - acetamidophenyl)propyl]trimethyl — picrate, 2254¹.

allylethylhydroxyphenyl— salts, 65¹.

allylhydroxymethylphenyl— salts, 65¹.

(β - aminoethyl)ethyltrimethyl— picrate, 2660¹.

(β -aminoethyl)trimethyl— chloride, 2459¹.

benzyl(β - bromoallyl)dimethyl— iodide, 53¹.

benzylethylhydroxyphenyl— salts, 65¹.

benzylhydroxymethylphenyl— salts, 65¹.

benzylhydroxymethyl- p -tolyl— salts, 65¹, 66¹.

benzyltriethyl— picrate, nitration of, 73¹.

benzyltrimethyl— picrate, 1250¹.

bis(β -bromoallyl)dimethyl— iodide, 53¹.

bis(β -chloroallyl)dimethyl— iodide, 53¹.

bis(p -iodobenzyl)dimethyl— bromide, 54¹.

(6 - bromohomopiperonyl)trimethyl— salts, 1270¹.

(p -bromophenyl)trimethyl— halides, soly. in Me_2CO , 394¹.

(carboxycyclopentylmethyl)trimethyl— iodide, Et ester, 59¹.

(α -carboxyethyl)diethylmethyl— iodide, Et ester, 60¹.

(α - carboxyethyl)methyldipropyl— iodide, Et ester, 60¹.

γ - carboxy - γ - (hydroxypropyl)trimethyl— chloroplatinate(?), di-Et ester, 1632¹.

(carboxymethyl)dimethylphenethyl— iodide, Et ester, 1460¹.

(α - carboxy - δ - phenylbutyl)trimethyl— iodide, Et ester, 59¹.

p - (β - carboxyviny)phenyl]trimethyl— iodide, menthyl ester, 907¹.

β -chloroallyltrimethyl— bromide, 53¹.

(p - chlorobenzyl)trimethyl— bromide, 53¹.

(β - chloroethyl)ethyltrimethyl— salts, 2660¹.

(β - chloroethyl)trimethyl— chloride, 2459¹.

(γ - cyano - γ - hydroxypropyl)trimethyl— salts, 1631¹, 1632¹.

(α - cyclopentyl - β - hydroxyethyl)tri- methyl— iodide, 59¹.

dibenzyltrimethyl— picrate, 73¹.

diethylbis(γ - phenoxypropyl)— bromide, 3355¹.

diethyltrimethyl— hydroxide, decompn. of, 2660¹.

(3,4-dihydroxyphenethyl)trimethyl— iodide, 2669¹.

(3,4-dimethoxyphenethyl)trimethyl— iodide, 2669¹.

(β - dimethylaminoethyl)ethyltrimethyl— picrate, 2660¹.

dimethylbis(p -nitrobenzyl)— chloride, 3614¹.

dimethyldiphenethyl— salts, 2660¹.

dimethyl(α - methylbenzyl)phenyl— chloride, 2673¹.

dimethyl(o - nitrobenzyl)phenyl— chloride, 2884¹.

elec. cond. of, in liquid H_2S solns., 847¹.
 (ethoxymethyl)diethylmethyl— hydroxide, and iodide, 2661¹.

ethyltrimethylphenethyl— salts, 2660¹.

ethyltrimethyl(β - phthalimidoethyl)— bromide, 2660¹.

ethyltrimethylpropyl— hydroxide, and salts, 2660¹.

ethylenebis[ethyltrimethyl— iodide], 2660¹.
 ethylenebis(trimethyl— chloride), 2459¹.

ethylenebis(trimethyl— picrate), 2660¹.

ethyl(β - hydroxyethyl)dimethyl— salts, 2660¹.

ethylhydroxyphenylpropyl— salts, 65¹.

(formylmethyl)trimethyl— hydroxide—see *Muscarine*.

(p formylphenyl)trimethyl— iodide, 403¹, 895¹.

free radicals, 395¹, 1800¹, 2672¹.

(o-hydroxybenzyl)trimethyl— iodide, 3614¹.

(β - hydroxyethyl)methoxydimethyl— salts, 2248¹.

β - hydroxyethyltrimethyl— hydroxide— see *Choline*.

[α - (hydroxymethyl) - δ - phenylbutyl]tri- methyl— iodide, 59¹.

hydroxymethylphenylpropyl— salts, 65¹.

iron compds. with coordination nos. 5 and 7, 711¹.

(isobutoxymethyl)trimethyl— salts, 2660¹.

isobutyltrimethyl— picrate, 2660¹.

(β -methylaminoethyl)trimethyl— chloride, 2459¹.

m (and p)-nitrobenzyltriethyl— picrate, 73¹.

quaternary halides, reactions with amines, 409¹.

quaternary hydroxides, decompn. of, 2660¹.

quaternary perhalides, 394¹.

quaternary, velocity of formation of, 2255¹.

tetraethyl— compd. of fluoboric acid, 1070¹.

tetraethyl— hydroxide, effect on muscle, 3965¹.

tetraethyl— hydroxide, reaction velocity with org. halides, 1581¹.

tetraethyl— iodide, elec. cond. in metal alkyls, 891¹.

tetraethyl— iodide, rotation x-ray photo- graphs of, 3285¹.

tetraethyl— picrate, cond. in acetone, 1397¹.

tetramethyl— azidodithiocarbonates, 3326¹.

tetramethyl— chloroplatinate, crystal struc- ture of, 3500¹.

tetramethyl— compd. of fluoboric acid, 1070¹.

tetramethyl— cupribiuret, 866¹.

tetramethyl— hydroxide, effect on muscle, 3965¹.

tetramethyl— hydroxide, reaction velocity with org. halides, 1581¹.

tetramethyl— hydroxide*, 1627¹.

- system: water- NH_3-CO_2 —, partial pressure of CO_2 , NH_3 and water over, 1212^a.
- Ammonium nitrosophenylhydroxylamine**. See *Cupferron*.
- Ammonium oxalate**, crystal structure of, 1383^a.
- soly. of, 2210^a.
- Ammonium paramolybdate**, 3171^a.
- Ammonium perchlorate**. (See also *Alkali metal perchlorates*.)
- soly. in water in presence of NH_3 , 2412^a.
- Ammonium persulfate**, hygroscopic tendency of, removal of, P 2538^a.
- manuf. of, electrolytically, 1935^a.
- soly. in water in presence of NH_3 , 2412^a.
- Ammonium phosphates**, dissocn. pressures of, 3300^a.
- manuf. of, P 2964^a, 4006^a.
- manuf. of, plant for, 2760^a.
- $\text{NH}_4\text{H}_2\text{PO}_4$, manuf. of, P 2173^a.
- $(\text{NH}_4)_2\text{HPO}_4$, manuf. of, P 994^a, P 2964^a.
- specifications for, 2109^a.
- Ammonium phosphotungstovanadate**, 1233^a.
- Ammonium polysulfide**, prepn. of, P 1378^a.
- Ammonium salts**. (See also *Ammonium compounds*; *Ammonium compounds*, substituted.)
- assimilation by *Mucors*, 2294^a.
- in blood, 950^a, 1839^a.
- decompn. voltages of, in liquid NH_3 and in water, 526^a.

- detection and detn. in fertilizers, 1324^a.
 detection of, 3328².
 effect on cocaine anesthesia, 3680⁴.
 effect on yeast fermentation, 473⁷.
 explosive, 3745⁴.
 of mono- and poly-basic acids, soly. in water in presence of NH_3 , 2412⁹.
 in nutrient media for orange trees, 2012⁷.
 nutrient solns. contg., plant growth in relation to H-ion concn. of, 3070³.
 oxidation and reduction by insol. Fe compds., 2855¹.
 from purification of gases, P 3733⁶.
 transition point between -30° and -40° , 199⁷.
 volatilizing app. for, 837⁸.
Ammonium stannio-iodate, 865²
Ammonium sulfate, acid and H_2O removal from con., P 303⁹.
 ammonia manuf. from, 3731³.
 from calcium sulfate, 476⁷.
 from coal, 2374⁸.
 corrosion by, 48⁸.
 crystals of, production of large, 2374⁸.
 distn. effluents, removal and recovery of phenols from, 2549⁸.
 drying, P 2964⁴.
 effect of S and, on Pahala blight of sugar cane, 3415¹.
 as fertilizer, 790⁴, 4005⁴.
 for corn, 790⁸.
 effect on soil reaction, 3414².
 for hops, 3248⁸.
 for rice, 790².
 soil acidification by, 2163¹.
 soil acidity development from use of, effect of buffer capacity of soil on, 3245⁴.
 for sugar cane, 1893¹, 2523^{5, 6}, 2524⁷, 2753¹.
 for wheat, 1863⁶
 fertilizing with, H-ion concn. of soil and, 2954⁹.
 fertilizing with, N recovery in, 1163⁴.
 -halide mixts. in quant. analysis, 1773¹.
 from H_2S in gases, P 3733⁶.
 hygroscopicity of, effect of pyridine sulfate on, 2549⁹.
 manuf. of—see also "recovery from distn. gases" under *Ammonia, manufacture of*
 manuf. of, P 1335⁹, P 2537², P 2964⁴, P 3429², P 3716⁶.
 from $(\text{NH}_4)_2\text{S}_2\text{O}_8$, 4030⁴.
 at Badische Anilin und Soda Fabrik at Oppau, 4030².
 physico-chemistry of, 3730⁶.
 plant for, 2760⁷.
 nitrification of, in soil, 788².
 as nitrogen source for apple trees, 4000⁴.
 plant at Derby, England, 3121².
 precipitation of active principle filtrates of *B. diphtheriae*, 3066⁷.
 salt temp. of solns. with CuSO_4 or ZnSO_4 , 3297⁷.
 soly. of PbSO_4 in aq., and in its mixts. with HNO_3 and HCl , 2589⁸.
 system: $\text{NH}_4\text{NO}_3\text{--H}_2\text{O}$ -, 2229⁷.
 system: $\text{La}_2(\text{SO}_4)_3\text{--H}_2\text{O}$ -, 711¹.

 system: $\text{K}_2\text{SO}_4\text{--K}_2\text{CrO}_4\text{--}(\text{NH}_4)_2\text{CrO}_4$ -, 523⁹.
 system: uranyl sulfate- H_2O -, 3529².
 weed control with, P 2044⁷.
 in yeast nutrients, assimilability of N from, 118⁹.
- Ammonium sulfite**, analysis of, 3576⁹.
 -bisulfite process, 1880⁸.
 manuf. from coal gas, 4049².
 reaction with phosphates, 2953⁴.
Ammonium sulfoxypolymolybdates, 1939⁴.
Ammonium tartrate, rotatory dispersion of, 3600².
Ammonium thiocyanate, carbon disulfide and NH_3 manuf. from, 4032².
 from coking, 3712⁸.
 color production in, by light, 2435⁴.
 effect on germination of potatoes, 1137⁸.
 photochemistry of, 3561⁹.
 transformation to thiourea, kinetics of, 3520⁹.
Ammonium tungstovanadophosphates, 542⁹.
Ammonium uranyl sulfate, 3529².
Ammonium vanadic sulfate, 712^{1, 2}.
Ammonium vanadylcitrate, 542⁹.
Ammonium vanadylmalonate, 2230⁷.
Ammonium zinc sulfate, solid solns. with NH_4Cu sulfate, and with NH_4Fe sulfate, soly. of, 3503^{1, 2}.
Ammono aldehydes, 2257⁹.
Ammono-carbonic acids, and salts, elec. cond. of, in liquid NH_3 , 3522⁸.
Ammonocarbonous acid. See *Hydrocyanic acid*.
Ammonoformaldehyde. See *Hydrocyanic acid*.
Ammonphos, as fertilizer for sugar cane, 2523⁶.
 wheat fertilizing with, 1863⁶.
Ammunition. See *Explosives; Projectiles*.
Ammunition wads, compn. for, P 3261¹.
Amniotic fluid, biochemistry of, 125⁸.
Amona, emulsification with, 3993⁷.
Amonal, explosions of, photographs of, 1886⁸.
Amorphophallus konjac, manna of, 3382⁸.
Amorphous substances, entropy of, 1217².
Amphiboles. (See also *Hornblende*.)
 biotite-andesite-, 42⁸.
 compn. of, 1238².
 grünerite, 3329⁴.
Amphibolite, Australian, compn. of, 1241⁵.
Amphoteric substances (ampholytes), aq. solns. and crystd. salts of, 1579².
 cellulose as, 2793⁹.
 double-ion detn. in, 2412⁹.
 hydroxides, their aq. solns. and crystd. salts, 3522¹.
 isoelec. and isoionic reactions of, 921¹, 3635⁵.
 isoelec. points of, equation for, 2210⁶.
 neutralization curves for, 1604².
 permeability of collodion and protein membranes for, 263⁸.
 silver hydroxide, 3795³.
 system of 2, behavior of, 1131¹.
Ampoules, glass containers, testing, 2047⁹.
 glass, neutral reaction test for, 2758⁴.
 hydrogen-ion concn. of, detn. of, 3638⁹.
 two-compartment, for holding injection liquids, P 802¹.
Amygdalase, identity with gentianase, 3912⁸.
Amygdalin, water, keeping quality of, 624⁸.
Amyl acetate. See *Acetic acid*.
Amyl alcohol, active—see *1-Butanol, 2-methyl-*.
 adsorption at air-liquid interface, 3510⁸.
 dielec. const. and absorption of, 14².
 disscn. at high temps., 3800⁷.
 effect on body temp., 1878⁹.
 on diastase liberation in cells of salivary glands, 2737⁸.
 on fermentation, 3067².
 on intestine, 454⁹.
 on protective action of liver, 1809⁹.

- and esters, review, 3888⁵.
 films on water, movements of, 1909⁵.
 from gasoline, 2184².
 optical rotation in magnetic field, 3811².
 partition of lactic acid between water and, 3529⁵.
 in peppermint, 2959².
 production by *B. pasteurianum*, *B. ascenden-*
s and *B. xylinum*, 1998⁵.
 reaction with PhN_2Cl , velocity of, 572⁵.
 reactivity of OH-H atom in, 3887⁵.
 spontaneous ignition temp. of, effect of
 anti-knock compds. on, 323⁵.
 temp. for initial combustion of, 1697⁵.
sec-**Amyl alcohol**. See *2-Pentanol*.
tert-**Amyl alcohol**, acetate, velocity of hy-
 drolysis of, 1581¹.
 effect on fermentation, 3067².
 phys. consts. of, 3887⁵.
 reactivity of OH H atom in, 3887⁵.
Amylamine, *N*-ethyl-*e*-phenyl-, and -HCl,
 2883¹.
 ———, *N*-*p*-methylbenzal-, 2882².
 ———, *N* - [γ - (3,4-methylenedioxyphenyl)-
 propyl], and salts, 2882².

 ———, *N*-piperonylidene-, 2882².
 ———, *N*- γ -*p*-tolylpropyl-, and -HCl, 2882².
Amylases, activation by substances produced
 by fermentative organisms, 920⁵.
 activity of, detn. of, 3923⁷.
 activity toward leguminous starches, 1667⁵.
 antiseptic action of, 416⁷.
 of *Aspergillus oryzae*, purification of, 2287⁵.
 of bacterial origin, 3634⁵.
 in black mustard, 1666².
 blood, effect of starch on, 2738⁵.
 in blood of nursing infants with digestive
 disturbances, 3080⁵.
 complement of, 424¹, 1278⁵.
 compds. with inactivating substances, 253¹.
 detn. in blood, 3380⁵.
 effect of Wiesbaden hot spring water on,
 2280⁴.
 of emulsin, 3371⁷.
 in fermentation of glycogen and starch by
 maltase-free yeast, 3207⁵.
 of germinated barley, hydrolysis of starch
 by, 2278⁵.
 hydrolysis of starch by pancreatic and malt,
 H-ion concn. in, 3637⁷.
 ion activation of, 3068⁷.
 ionic nature of, 1128⁵.
 of liver, 954¹, 2278⁵.
 in milk, 2744⁷.
 pancreatic, effect of Na acetate, Na borate,
 Na citrate and Na phosphate on, 3916⁴.
 in pancreatic juice, 2277⁴.
 pancreatic, purification by adsorption, 255⁵.
 in plant cells, origin of, 2491⁵.
 of potassium-starved sugar beets, ionic ac-
 tivation of, 926².
 proteases and, 595⁵.
 salivary, effect of tartar emetic on, 3632⁵.
 reactivation of, 3389⁵.
 reactivation of, after inactivation by
 acid, 951⁵.
 sepn. from lipase and trypsin, 2706².
 in stomach, 262⁵.
 ultrafiltration of, 2142¹.
Amylene. See *1-Pentene*.
Amylene hydrate. See *tert*-Amyl alcohol.
Amyl ether, temp. for initial combustion of,
 1697⁵.
Amyl nitrite, as catalyst of autoxidation, 736⁵.
 effect on fermentation, 3067².
Amylobiose, from starch, 1472⁴.
 ———, octaacetyl-, prepn. of, 1472⁴.
Amylodextrin. See *Starch*, sol.
Amyloid, changes in, diagnosis of, 2733⁵.
 formation of, 265⁵.
 formation of, reticulo-endothelial system
 and, 2315².
 reactions of, 926⁵.
 review, 3035¹.
Amyloidosis, 265⁵.
Amylolysis. (See also *Amylase*; *Starch*.)
 by blood and organs in endocrine insufficiency,
 770⁴.
 of duodenal juice in relation to origin of
 starch, 3221⁵.
 hydrogen-ion concn. optimal for, effect of
 temp. on, 3909⁴.
 mechanism of, 251¹.

 thermoelec. forces in, effect of magnetic field on, 3810⁹.
 wetting by Hg, 2416⁹.
- Antimony, analysis**, cupferron in, 3791¹.
 detection, 1779¹, 2233³.
 detection in tinfoil, 1944⁹.
 detn., 36⁴, 545⁹, 1071³, 1105⁴, 1606⁴, 3575⁵ ⁴.
 detn. and sepn., 1236⁷.
 detn. and sepn. from alkalis, 2857⁵.
 detn. in alloys, 3853⁹.
 in Babbitt metal, 2239⁹.
 in bearing metal, 3579⁴.
 in glass, 2771⁴.
 sepn. from Bi, 3581⁸.
 sepn. from Tl, 3850⁹.
 sepn. of Sn, 3174².
- Antimony, metallurgy of**, P 1093⁴, 1951⁴.
 at Costerfield, Victoria, 1081⁸.
- Antimony alloys**. (See also *Babbitt metal*; *Bearing metals*; and "system" under *Antimony*.)
 analysis of, 3853⁹.
 bismuth-, Te-, Zn-, Cd-, Pb-, and Sn-, magnetic susceptibility of, 2655⁴.
 cadmium-Ag-, P 2116⁹.
 cadmium-, surface tension of molten, 3590².
 copper-, color of, 1088⁷.
 internal friction of molten, 2581³.
 surface tension of molten, 3292².
 copper-Pb-, corrosion by HNO₃, HCl and H₂SO₄, 3882⁹.
 copper-Pb-, for brake linings, etc., P 3886².
 copper-Pb-Sn-, 1246³.
 elec. resistance of certain, 3011².
 hardness of, 2654⁴.
 lead-, P 888³.
 lead-, and Pb-Cu-, for accumulator grids, etc., P 729⁴.
 lead-Bi-, electrolysis of, 3809⁸.
 lead-, for cables, etc., P 729⁴.
 lead-, thermodynamic study of, 3013⁴.
 lead-Sn-, 3340¹, 3879⁴.
 silver-, 2115³.
 tarnish resistance and phys. properties of, 1956².
 thermoelec. e. m. f. of, 1052².
 tin-, analysis of, 2234⁴.
 color of, 1088⁹.
 thermoelec. e. m. f. of, 1052².
 tin-, Sn-Cu-, and Cu-Pb-Sn-, fluidity of, 2641⁴.
 zinc-, surface tension of molten, 3590².
- Antimony arsenide**, elec. cond. of, 3011⁴.
- Antimony bromide**. (See also *Antimony halides*.)
 (SbBr₃), ionic mobilities of solns. of, in molten AlBr₃, 687⁹.
 mixt. with CHBr₃ for mineralogical analysis, 1781⁴.
 reaction with Br, 3301⁴.
 reaction with BrCN, 3170⁴.
- Antimony chlorides**. (See also *Antimony halides*.)
 as catalysts for manuf. of amines and nitriles, P 1272⁷.
 SbCl₃, mixt. with HgCl₂ and HgI₂ for mineralogical analysis, 1781⁴.
 prepn., properties and mineralogical uses of, 1781⁴.
 reactions with SnI₄ or PI₃, 3571⁴.
 reaction with BrCN, 3170⁴.
 reaction with Cl, 3301⁴.
 reaction with diazotized diamines, 1105².
 reaction with PhNMe₂, 1973⁹.
 SbCl₃, addn. compd. with *p,p'*-bis(dimethyl-amino)triphenylamine, 2670⁴.
 parachor of, chem. constitution and, 2580⁴.
 reactions with SnI₄ or PI₃, 3571⁴.
 reaction with Bz₂O₃, 1454⁴.
 reaction with BrCN, 3170⁴.
- Antimony compounds**. (See also *Stibenyl*.)
 alkali and alk. earth, of mercapto carboxylic acids, P 3253⁹.
 azo dyes contg. Sb, 71².
 classification of org., similar to tartar emetic, 2666³.
 complex, P 3711⁴.
 with cupferron, soly. of, 3791¹.
 effect on enzymes, 3632⁴.
 heterocyclic, P 4028⁷.
 Heyden 693, kala-azar treatment with, 3967⁸.
 with iodine, 865¹.
 kala-azar treatment with, 3967⁸.
 manuf. of org., P 917⁸.
 of mercaptoacetic acid, P 594².
 with nitrosyl chloride, 3573⁹.
 pharmaceutical, P 2170⁹.
 pharmacol. action of, 3967⁸.
 of salts of hydroxyquinolinesulfonic acids, P 987⁴.
 surra treatment with, 775¹.
 of thioglycollic acid, P 987⁷.
- Antimony glance**. See *Stibnite*.
- Antimony halides**, elec. cond. of, in liquid H₂S solns., 847⁴.
- Antimony hydride**. See *Stibine*.
- Antimony iodates**, complex, 865¹.
- Antimony iodide**. (See also *Antimony halides*.)
 SbI₃, elec. moment of, in C₆H₆, 3783⁹.
 SbI₃, reaction with PCl₅, 3571⁴.
- Antimony ion**, transport no. of, 687⁹.
- Antimony ores**, of Macedonia, Black Mts., near Skopje, 1240⁹.
 properties and uses of, 1951⁴.
 sepn. by flotation, P 2455².
- Antimony oxides**, crystal structure of, 3825⁹.
 density, crystal structure and nature of, 3775⁴.
 properties of, 3169⁴.
 Sb₂O₃, reaction with MnO₂, 1419⁴.
 Sb₂O₃, colloidal, formation of, 1044¹.
- Antimony salts**, manuf. of, 627⁸.
- Antimony selenide**, elec. cond. of, 3011⁴.
- Antimony sulfides**. (See also *Stibnite*.)
 detn. in rubber fillers, 1374⁴.
 manuf. of, P 2764⁴.
 for rubber manuf., 2574⁷.
 Sb₂S₃, adsorption of carotin by, 3091⁴.
 colloidal, coagulation of, effect of hydrolysis of sols and pptg. electrolytes on, 10⁹.
 colloidal, particle size detn. in, 2829⁴.

- colloidal, sols of Au and Ag treated with, 3514¹.
- elec. conduction in, 1748².
- elec. cond. of compressed mixts. with Sb, 2595¹.
- photomicrography of, 1019⁷.
- Sb₂St, colloidal, viscosity in presence of KCl, 1044².
- Antimony telluride**, elec. cond. of, 3011⁴.
- Antimony thioglycolamide**, 1631⁴.
- Antioxidants**, catalysis by, 3529⁹.
- for drying oils, 184⁴.
- in dyeing, 3465⁴.
- effect on fluorescence, 2612².
- effect on rubber, 3141⁴.
- in rubber aging, 2816⁶.
- in rubber (*Hevea*), isolation of natural, 4095².

 - hydrogenation of, catalysts of, P 2556².
 - industry, 3738⁸.
 - melting point, detn. of, 170⁹.
 - micelle, constitution of, 3738⁹.
 - molded products from, P 1693³.
 - mummification and, 840⁹.
 - nomenclature of, 1343¹.
 - oxidation of, P 2793¹.
 - oxidizing, motor fuel from, P 3123⁴.
 - oxidizing to produce aldehydes, alcs., etc., P 1546⁹.
 - paper impregnated with, P 4036⁷.
 - for pavements, specifications of A. S. T. M. for, 1157².
 - in paving mixts., recovery and examn. of, 2972².

- from petroleum distn., P 173³.
 preheating with flue gases, 3736¹.
 prepu. of, P 2557².
 residue in refineries, road surfacing with, 1540⁸.
 resources of U. S. in 1925, 1182⁸.
 review for 1926, 3734¹.
 for road building, 2185⁴.
 rock, P 1877⁹.
 rock, petroleum from, 2790¹.
 roofing felt satn. with, P 3115⁸.
 for roofing, specifications for, 2778².
 in Russia, 1182⁷.
 slabs and sheets of, P 3740⁹.
 softening point of, 3739³.
 softening point of, detn. of, 617¹.
 storing, heating and handling, app. for, P 3127⁴.
 Syzran, 1703⁷.
 in tar, 3731⁴.
 tar detection in, 3266⁸.
 tars, 4059¹.
 varnishes—see *Varnishes*.
 vein at Bentheim, 2184⁹.
 wetting ability of, surface tension and, 2792⁵.
Asphyxia. (See also "poisoning" under *Carbon monoxide*.)
 effect on action of convulsant dyes and on their entrance into substance of nervous system, 188⁴.
 on blood sugar of fish, 2021⁷.
 on cellular respiration, 123⁶.
Aspidinol, prepu. of, P 3105⁸.
Aspirators, thermal expansion, P 2202⁸.
Aspirin. see *Acetylsalicylic acid*.
Aspirochyl, pharmacol. action of, 2319⁴.
 toxicity of, 771⁷.
Assaying. See *Analysis*.
Assimilation. See *Metabolism; Plants*.
Association. See *Molecular association*.
Association of Official Agricultural Chemists, pure food movement and, 1315².
Astacus fluviatilis. See *Crawfish*.
Aster, China—see *Callistephus chinensis*.
tripolium, compn. of, 2718⁴.
Asterias, eggs—see *Eggs*.
ochraceus, metabolism and respiration in, H-ion concn. and, 1151⁷.
Asthma, blood Ca and K in, 2503⁷, 3675⁸.
 blood serum Ca in, 3079⁹.
 ephedrine effect on, 1307⁹, 2321².
 "free breath" for, 624⁹.
 sputum in, crystals in, 1822¹.
 treatment by breathing dry air, 2302⁹.
 treatment with "pneumarol," 2032⁴.
Astilbe, *chinensis* and *A. japonica*, HCN in, 1831¹.
Astringency, of persimmons, destruction by C₂H₄, 3688³.
Astringents, official red gums, 4023³.
Asymmetry. (See also *Carbon; Copper*.)
 biochemistry of, 426¹, 1998².
 of carbon atom from auxiliary valency, 1402¹.
 odor and mol., 229⁹.
 review of mol., 889⁵.
Ataxia, locomotor, cerebrospinal fluid in, H-ion concn. of, 2151⁴.
 locomotor, cerebrospinal fluid in, proteins of, 2152⁹.
Atrophies. See *Marasmus*.
Atmosphere. (See also *Air; Nitrogen fixation; Oxygen*.)
 hook: Stellar, 534⁹.
 carbon monoxide content of, 3730⁴.
 disperse systems of, 3786⁹.
 dusts dispersed in, 3786⁹.
 electricity and radioactivity of, at Spitzberg, 3308⁹.
 at high altitudes, acclimatization to, 261⁷.
 adrenaline blood pressure curves and serum Ca mirror, 3951⁷.
 effect of CO₂ during exposure to, 765².
 effect on absorption of glucose by red blood cells, 1143⁵.
 effect on alky. of blood, 3222⁸.
 effect on animal organism, 3668⁸.
 effect on artificial hyperthyroidization, 766⁸.
 effect on blood and lungs, 3677¹.
 effect on body temp., 2311¹.
 effect on cation content of organs and blood, 2279⁹.
 effect on cholesterol and fat content of blood and adrenals, 2303².
 effect on liver, 3664⁴.
 exercise in, adaptation of organism to, 1290⁴.
 hemolyzing action of sun rays in, 421⁹.
 photobiol. desensitization at, 452².
 physiol. effect of, 3665⁴.
 reproduction of sickness due to, 2311².
 ionization equil. in, 1406³.
 ionization of, 3547⁴.
 origin and compn. of, 1219².
 oxygen-deficient, effect on sea urchin eggs, 2035⁸.
 oxygen in, nutrition economy and, 950⁸.
 oxygen-poor, effect on germination, 944¹.
 ozone content of, 2097¹.
 ozone layer in upper, solar spectrum and, 534².
 penetrating radiation at sea level, 358².
 planetary, pressures of, 3331¹.
 pollution of, 619⁹, 2752³.
 pollution of, in English and Scotch towns and cities, 1511⁴.
 radioactive substance in, distribution of, 1056¹.
 radioactivity of, fixation by terrestrial elec. field, 3544⁵.
 rare-gas content of, 1036⁴.
 structure of, 2825⁴.
 of sun, compn. of, 2862².
 temp. of, effect on temp. of soil, 1162⁹.
 transparency to visible spectrum, 2611⁴.
 upper, constitution and ionization of, 3546⁸.
 constitution of, 1750¹.
 nitrogen (solid) in, 3832¹.
Atomic heat, of lead, 2091⁹.
Atomic nucleus. (See also *Protons*.)
 absorption of γ -rays by, 3017².
 alpha-rays and, 2219⁹.
 of aluminum, polarizability of, 2423².
 condensation of, 2421⁴.
 of helium, 2841¹, 3544⁴.
 magnetic field in vicinity of, 1752⁴.
 motions of, coupling with electronic motion in diat. mols., 2840¹.
 number of electrons, α -particles and isotopes in, 1589⁸.
 reflection of α -particles from, 2602¹.
 structure of, 205¹, 1752², 3542⁹, 3818¹.
 theory of, review on, 855⁹.
 transformations of, 3015⁴.
Atomic number. (See also *Molecular number*.)
 atomic structure and, 1925⁷.
 atomic vol. and, 345⁸.

- behavior of substances of diff., with ultragamma radiation of Hess, 2007⁴.
 Bohr theory and, 1925⁵.
 entropy change and, 3812⁶.
 ionization potential as function of, 358⁶.
 mol. spacing and, 1730⁶.
 photoelec. threshold and, 1754⁸.
 Röntgen spectrum and, 2224¹.
- Atomic structure.** See *Atoms*.
- Atomic theory, books:** 1923⁷; *The Progress of*, 3306⁶.
 Cannizzaro and, 2823⁶.
 disease and, 127⁹.
 dispersion formulas of, and theory of continuity, 3817¹.
 history of, 3817¹.
 review on, 855⁹.
- Atomic volume, additive, in inorg. compds.,**
 law of, 3289⁸.
 atomic nos. and, 345⁶.
 of carbon and H, 1036⁹.
 of cobaltamines, 677⁸.
 curves of, 47⁷.
 and formation and stability of cyclic compds., 1100⁷.
 heat of formation and, 3815⁸.
 ionization potential in relation to, 2220⁶.
 of ions of alkali metals, relation to exchange in ions, 3795⁹.
 mol. vol. and, 1037⁸, 2824⁸.
- Atomic weights.** (See also *Periodic system*; and the individual elements, as *Bromine*.)
 comm. rept. on, 840⁹, 1381⁸.
 effect on ratio of internal pressure to d., 1728¹.
 excess, 1925⁷.
 of isotopes, 855³, 2841⁸.
 of isotopes, relation to life period and type of transformation, 204⁸.
 of isotopic radioactive elements, relation to velocity of α -rays which they emit, 1926⁶.
 of metals, relation between pharmacol. action and, 1490⁸.
 packing effects and, 3308³.
 prediction of new, 3821².
 whole-no. rule, 3543⁸.
- Atomization, of milk or other liquids to be dried, P** 3095⁸.
- Atoms.** (See also *Elements*.)
 absorption of light quantum by, 700⁴.
 activation of, theory of, 1046⁷.
 affinity of Br, for electron, 1753⁸.
 anisotropic, optical rotation detn. in systems of, 2419⁷.
 asymmetric—see *Carbon*; *Copper*.
 books: 2848⁸; *Reflections on the Structure of the*, 534⁹; *Magnetism and At. Structure*, 859²; *Die Welt der*, 1923⁷; *The Romance of the*, 1923⁷; *Three Lectures on At. Physics*, 1924⁹; *The Structure of*, 2227²; *At. Form with Special Reference to the Configuration of the C Atom*, 2614⁴; *Die Seltenen Erden vom Standpunkte des Atombaues*, 2614⁴; *Konstanten der Atomphysik*, 2614⁴; *What Is the Atom?* 2848⁸; and *Mols.*, 2848⁸; *Die neuere Atomistik im Unterricht*, 3307⁷; *Stars and*, 3314³; and *Electrons*, 3314⁴.
Das Atom—Eine allgemein verständl. Darst., 3314⁴; *Die Verteilung der Elektronen in den*, 3314⁴; *Recent Development in At. Theory*, 3562⁸; *Der*
Bau der, und das periodische System, 3562⁷; *The ABC of*, 3562⁹; *At. Structure and Spectral Lines*, 3562⁹; *L'atomisme d'Epicure*, 3823⁸.
 breakdown of, at high pressures, 1228⁸.
 celestial harmony in, 2839⁴.
 collision of α -particles with He, 3544³.
 collisions of, quantum mechanics of, 2422⁴.
 collisions of 2nd kind with ions, 1222⁸.
 collisions with electrons, ionization in, 2590⁸.
 collision with electrons, radiation produced by, 3828².
 coordination of, having 4 magnetic parts, 2422².
 crit. potentials of iodine, 3823¹.
 crit. potentials of Hg and metastable, 3547⁸.
 cross section of oriented H, 1728⁸.
 of crystals, electron distribution in, 1223⁹.
 in crystals, strength of, 1386¹.
 in crystals, symmetry of, 3498².
 debris, examn. by point-counter method, 2601⁴.
 decompn. of, 2219⁶.
 energy generation by artificial, 2421⁴.
 by α -rays of Po, 3152⁴.
 decompn. of C, 2219⁷.
 deflection in inhomogeneous magnetic field, effect of velocity distribution on, 2423⁹.
 diam. of, 3004¹.
 dielec. const. of H, 2840².
 dimensions of, optical rotation and, 357².
 dimensions of, photoelec. effect and, 3548⁸.
 disintegration of—see also *Matter*; *Transmutation*.
 disintegration of, app. for rendering it audible, 529².
 by collision with α -particles, 698⁶.
 method of observing, 2601⁸.
 disintegration of Pb, 855³.
 disintegration products of, detection in transmutation of elements, 2601⁷.
 disruption by α -rays, radioactive products in, 3308⁶.
 doubly ionized, in Hg vapor, 2603⁸.
 dynamical model for complex, 2422¹.
 easily detachable electrons in, no. of, 2221⁸.
 effect of auxiliary valency linking on C, 1401⁸.
 effect of radiation and perturbations on, 1750⁸.
 effect of size and shape on intensity distribution of scattered x-rays, 1730¹.
 elec., 2422¹.
 of electricity as quantum-theory law, 2422⁴.
 electron affinity of H, 3817⁹.
 electronic levels in, valencies in relation to completion of, 698⁹.
 electronic orbit deformation in cryst. salts, 3546⁷.
 electronic orbits on relativity theory, 2839⁸.
 electrons in, counting no. of, 532¹.
 electrons in many-electron, size-screening consts. for, 1384⁹.
 emission from solids by chem. attack of surface, 1403⁶.
 energy levels of, effect of light on, 1756².
 energy of binding of heavy, 3239⁴.
 excitation potentials of Hg, 1501³.
 fields, detn. of, 2424⁴.
 in fluorescence, simultaneous ejection of 2 electrons from inner ring of, 3550¹.
 force within, 2590⁹.
 fragments, detn. of masses of, 1055⁹.
 fragments from Al, detn. of ratio charge/mass for, 2601⁶.

- fragments of Al, C, B and Fe, detn. of mass of, 2219¹
 fragments of, making visible the tracks of, 2219¹
 hydrogen, with spinning electron in wave mechanics, 2839⁹
 interaction of neutral, quantum mechanics of, 3542⁷
 ionization by electron impact, 700⁸
 ionization of, in Be oxide lattice, 1406⁷
 lattice energy and energy of dissoln. of electrons from electronic lattice of Ca, 1925⁹
 lattices and dimensions, 2081⁸
 light emission by H, 3823⁹
 luminous duration of, 3161¹
 luminous system of, ionization equil. of, 531¹
 magnetic deflection of rays of H, 1755¹
 magnetic H, non-magnetic mols. and, 2843³
 magnetic moment of, quantum mechanics and, 1209⁹
 magnetic moment of, vector formulas for, 3818⁷
 magnetic moments of alkali-metal, 206¹
 magnetic moments (two) of, 3151⁸
 magnetism and, 1920⁹
 magnet of, structure of, 2597⁴
 mech. theory of H, 2422⁷
 mechanics of, theory of, 2599⁸
